Electronics Letters

VOLUME 14, 1978

THE INSTITUTION OF ELECTRICAL ENGINEERS

Electronics Letters

THE INSTITUTION OF ELECTRICAL ENGINEERS

ELECTRONICS LETTERS is published fortnightly. Price: £7·00 ($16·00) per issue; annual subscription in UK £67·00, Overseas £94·00 ($200·00). Second-class postage paid at New York, NY. All copies for North America are sent by Air Freight to New York. Airmail direct to subscriber at an additional charge of £20·00. Available also in a concurrent microfiche edition at the same subscription rate as for the printed edition. Subscribers to both the printed and microfiche editions are given a 75% discount on the price of the microfiche edition

* Except in December when only one issue is published. There are 25 issues each year

All subscription inquiries and orders should be sent to the Publication Sales Department, IEE, Station House, Nightingale Road, Hitchin, Herts. SG5 1RJ, England. Telephone Hitchin 53331 (s.t.d. 0462 53331), Telex 26117

Contributions should be addressed to the Executive Editor, *Electronics Letters*, Publishing Department, Institution of Electrical Engineers, PO Box 8, Southgate House, Stevenage, Herts. SG1 1HQ, England
There is no page charge

All other correspondence, including advertisements, should be sent to: IEE Publishing Department, PO Box 8, Southgate House, Stevenage, Herts. SG1 1HQ, England. Telephone Stevenage 3311 (s.t.d. 0438 3311), Telex 261176, Telegrams Voltampere Stevenage, England. The telephone number of the IEE London office is 01–240 1871, Telex 261176

The advantages of rapid publication given by *Electronics Letters* are nullified if subscribers are subject to excessive delays in the receipt of the journal. The Executive Editor would be grateful to learn of any difficulties subscribers may experience*.

This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright Act 1956, part 1, section 7, whereby a single copy of an article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by the UK Board of Trade Regulations (Statutory Instruments, 1957, no. 868), no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy abstracts of papers or articles on condition that a full reference to the source is shown

The IEE appreciates that, on certain occasions, it could be very useful for organisations to be able to make copies of articles and papers. An IEE licensing arrangement exists whereby organisations entering into an agreement are legally entitled to make up to ten copies of an IEE paper or article. Full details may be obtained from the IEE Publishing Department at the above address

The appearance of the code at the bottom of an article in this journal indicates the copyright owner's consent that copies of the article may be made in the USA for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per-copy fee through the Copyright Clearance Center, Inc. for copying beyond that permitted by Sections 107 or 108 or the US Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes for creating new collective works or for resale. Payment is also required for copying of articles published before 1978

The IEE is not as a body responsible for the opinions expressed by individual authors

The IEE is a member of the Association of Learned & Professional Society Publishers

Subject index

ñ

100K uncooled GaAs m.e.s.f.e.t. amplifier as paramp replacement. E.de los Reyes, E.Camargo and R.Soares 378
10-bit monolithic high-speed d.a. convertor. A.Barna, J.W.Grace and N.L.Rhodes 542
13 μm wide stripe c.w. GaAs/GaAlAs d.h. lasers linear to more than 10 mW. C.J.Lindstrom and M.Janson 172
16 Gbit/s multiplexer experiment. U.Barabas 524
1.1 Gb/s pseudorandom pulse-code modulation of 1.27 μm wavelength c.w. InGaAs/InP d.h. lasers. S.M.Abbot, W.M.Muska, T.P.Lee, A.G.Dentai and C.A.Burrus 349
1/f noise and resistance between circular electrodes. L.K.J.Vandamme and J.C.F.Groot 30

h

20ps/Gate Gunn-effect high-speed carry finding device. N.Hashizume, S.Kataoka and K.Tomizawa 91
25 MHz current to frequency convertor utilising a new type of comparator. K.Schwingenschuh and F.Gross 358
2-dimensional digital filters, frequency response of. K.P Prasad and P.S.Reddy Errata 318
2-dimensional recursive filter design, on 2-variable reactance functions for. A.M.Ali and A.G.Constantinides 12

ı

3-level partial-response signalling for voice-grade circuits. J.Das and S.Rakshit 579
50mm diameter TE_{01} mode helical waveguide optimisation. G.H.Childs 140

A

A 14/12 GHz f.e.t. frequency convertor. P.Bura 255
A 36 GHz printed planar array. J.C.Williams 136
A 4-8 GHz dual gate m.e.s.f.e.t. amplifier. J.Goel and H.J.Wolkstein 167
A c.t.d. adaptive inverse filter. D.Corl 60
A fast d.f.t. algorithm using complex integer transforms. I.S.Reed and T.K.Truong 191
A functionally-complete ternary system. V.H.Tokmen 69
A loop phase-locked 74 GHz impatt oscillator usable for precise spectroscopy to the 500 GHz region. D.J.E.Knight 451
A low-cost long-term stochastic integrator. I.H.Witten and P.H.C.Macams 293
A membrane wave delay line. M.Luukala and P.Merilainen 123
A method for the assessment of the performance of high-speed analogue/digital convertors. O.J.Downing and P.T.Johnson 238
A minterm interchange operation in the Walsh spectrum domain. E.Eris 92
A new d.h. laser configuration with passive transverse field confinement. T.E.Rozzi, J.H.C.Van Heuven and G.H.In"T Veld 87
A new method of low-temperature zinc diffusion into GaAs and GaP using anodic oxides. T.Sakai, T.Suzuki and H.Hasegawa 248
A new method of timing-signal recovery for (1,0,-1) multiple-response signals. P.N.Ridout 354
A new signalling format for optical communications. L.Bosotti and G.Pirani 71
A new space-time integral equation for twodimensional transient scattering. B.Jecko and A.Papiernik 512
A new technique for device compatible anodic oxidation of GaAs. H.Tokuda, H.Yokomizo, Y.Adachi, T.Ikoma and J.Frey 163
A new technique for improving the acquisition performance of second-order phase-locked loops. J.P.McGeehan 42
A note on the evaluation of Schottky diode parameters in the presence of an interfacial layer. S.Ashok, J.M.Borrego and R.J.Gutmann 332
A note on volume holograms. M.P.Jordan and L.Solymar 271
A novel c.c.d. multiplying input technique. D.V.McCaughan, J.C.White and J.R.Hill 165
A novel configuration for charge-coupled devices. R.L.Carroll 217
A novel method of temperature compensation for multiplexed liquid crystal displays. C.Hilsum, R.J.Holden and E.P.Raynes 430
A precise digital phase shifter using a phase-locked loop. J.Austin and J.R.Forrest 254
A sequential regression algorithm for recursive filters. D.Parikh and N.Ahmed 266
A simple power control technique. S.Tiwari and S.Ashok 393
Absolute noise characterisation of avalanche photodiodes. M.C.Brain 485
Accuracy of numerical solution of temperature distribution in semiconductor devices under dynamic conditions. Z.Lisik 549
Accurate single section model of uniform R-C-NR structure. U.Kumar and K.Pal 384
Acouo-optical, lensless, concolver. A.Aiippi, A.Palma, L.Plamieri, G.Socino and E.Verono 525
Acoustic backscattering, electromagnetic versus, by prolate spheroids. B.P.Sinha 233
Acoustic microscope, reflective, signal processing in the. J.Attal and G.Cambon 472
Acoustic microscopy, characteristic material signatures by. R.D.Weglein and R.G.Wilson 352
Acoustic microscopy, reflection, contrast in. H.K.Wickramasinghe 305
Acoustic microscopy, scanning, Gray scale for. R.D.Weglein 656
Acoustic surface waves, thermal strain effects of, in layered media. K.Yamanouchi, M.Ishii and K.Shibayama 784
Acoustic wave attenuation, surface, optical image scanning by electronic control of, in CdS. Z.Ueda, J.Shirefuji and Y.Inuishi 26
Acousto-optical devices, high-stability, using bulk acoustic waves in TeO_2. V.V.Proklov, S.N.Antonov and M.Y.Mesh 535
Active inductance, new ideal, and frequency-dependent negative resistance using d.v.c.c.s./d.v.c.v.s.: applications in sinusoidal-oscillator realisation. R.Nandi 551
Active inductances using current conveyors and their application in a simple bandpass filter realisation. R.Nandi 373
Active networks, analysis of, using flow-graph technique. A.Cichocki and S.Osowski 227
Active networks, linear, on the sensitivity analysis of. E.A.Laksberg 221
Active *R* circuit:, realisation of nth-order lowpass voltage transfer function by, signal-flow-graph approach. C.Acar 729
Active R filter, multifunction, with two operational amplifiers. S.Venkateswaran 741
Active-RC prototypes, the derivation of switched-capacitor filters from. G.C.Temes 361
Active simulation of inductors using current conveyor. R.Senani 483
Adaptive difference detection and correction system for partial correction of transmission errors in linear p.c.m.. R.Steele, K.N.Ngan and D.J.Goodman 381
Adaptive filter based on s.a.w. monolithic storage correlator. P.M.Grant and G.S.Kino 562
Adaptive instantaneous pitch detector with microcomputer error correction. N.R.Malik and S.C.Huang 109
Adaptive observer, improved, with optimal convergence. C.K.Li 778
Adaptive optimal regulator, generalised disturbance. S.Mukhopadhyay 820
Adaptive orthogonal projection for rapid converging interference suppression. W.Buhring 515
Algorithm for identification of multivariable discrete-time linear systems. M.Brucoli, B.Maione and F.Torelli 313
Algorithms for integrated system optimisation and parameter estimation. P.D.Roberts 196
Alternative pedestal generation scheme gives flickerfree pictures from a pyroelectric vidicon chopper camera. G.S.Hoeksma 146
Amorphous-layer formation in GaAs by ion-implantation. Min-Shyong Lin 695
Amplifier, 100K uncooled GaAs m.e.s.f.e.t., as paramp. E.de los Reyes, E.Camargo and R.Soares 378
Amplifier, high-power 11 GHz, using high-efficiency impatt diodes. W.Thorpe and P.Huish 508
Amplifier module, medium power 12-18 GHz. K.B.Niclas 29
Amplifier, u.h.f. low-noise GaAs m.e.s.f.e.t., for colour t.v. broadcasting translator. M.Mitama and H.Katoh 319
Amplifiers, GaAs m.e.s.f.e.t., analysis of intermodulation distortion in. R.A.Minasian 590
An algorithm for the state assignment of synchronous sequential circuits. P.K.Lala 199
An asynchronous logic array for the realisation of logic systems with concurrency. M.Courvoisier 119
An equivalent focused reflector feed in place of any generalised defocused or extended feed. W.V.T.Rusch 5
An improved switched-capacitor integrator. G.C.Temes and I.A.Young 287
An improvement in printed circuit board routability using a maze-running algorithm. L.S.Pugh 8
An X band f.e.t. oscillator with low f.m. noise. H.J.Finlay, J.S.Joshi and S.C.Cripps 198
Analogue-digital converters, some proposals for improved forms of precision fast digital-analogue and. J.R.Stockton and R.B.D.Knight 790
Analysis of active networks using flow-graph technique. A.Cichocki and S.Osowski 227
Analysis of intermodulation distortion in GaAs m.e.s.f.e.t. amplifiers. R.A.Minasian 590
Analysis of the effect of spontaneous emission coupling on the number of excited longitudinal modes in semiconductor lasers. D.Renner and J.E.Carroll 779
Analysis, semisymbolic, of network sensitivity. A.F.Schwarz 291
Annual and annual-worst-month statistics of fading on earth satellite paths at 11.5 GHz. G.Brussard and P.A.Watson 278
Anodic oxidation, device compatible, a new technique for, of GaAs. H.Tokuda, H.Yokomizo, Y.Adachi, T.Ikoma and J.Frey 163
Antenna array, spherical random, parameters of a. T.A.Dzekov and R.S.Berkowitz 495
Antenna, choked waveguide feed, beamwidth variation with aperture diameter of the. K.M.Keen 406
Antenna, circular-disc printed-circuit, impedance of a. S.A.Long, L.C.Shen, M.D.Walton and M.A.Allerding 684
Antenna, effect of rain in the near field of an. D.P.Haworth, N.J.McEwan and P.A.Watson 94
Antenna, insular-image guide-fed short backfire. R.N.Simons and D.T.Shahani 644
Antenna, reflector, performance of a, incorporating a filtering Cassegrain mirror. R.J.Langley, P.A.Langsford and E.A.Parker 186

Antenna, short thin-wire, to measure the horizontal electric-field component at v.l.f. on the earth's surface. D.V.Thiel 804
Antenna sidelobe radiation, contribution of reflector profile errors to. A.B.Harris Errata 454
Antenna, strip-fed cavity-backed printed slot, network model for. D.T.Shahani and B.Bhat 767
Antenna, wire-mesh, electrostatically controlled. J.H.Lang, J.R.Gersh and D.H.Staelin 655
Antennas, coaxial, doubly fed. F.Rahman and T.S.M.MacLean 178
Antennas, explicit modelling of, with sparse-ground screens. E.K.Miller, J.N.Brittingham and J.T.Okada 627
Antennas, small toroidal. T.S.M.Maclean and F.Rahman 339
Anti-hangup system for p.s.k. tracking loops. C.P.Ashall and P.A.Matthews 213
Aperture coupled stripline coupler. M.Kumar and B.N.Das 216
Application of solitons to communication system. P.L.Chu and T.Whitbread 531
Application of super-resolution techniques to time domain reflectometry systems. B.Chambers 97
Approximations to hybrid mode slot line behaviour. C.M.Krowne Errata 317
Array, a 36 GHz printed planar. J.C.Williams 136
Array feed, multiple-beam dual-offset reflector antenna with an. T.S.Bird, J.L.Boomars and P.J.B.Clarricoats 439
Array, high-speed iterative, for binary multiplication. B.S.Dormido and D.MoA.Canto 742
Array phase measurements, random, range estimation from. S.A.Kassam and Y.Shamash 40
Array, slotted waveguide linear, with polarisation control. A.J.Sangster 616
Array, the Yagi, of concentric loops. G.W.Raffoul and L.C.Shen 168
Asynchronous, an, logic array for the realisation of logic systems with concurrency. M.Courvoisier 119
Attenuation/rain-rate relationships on terrestrial microwave links in the frequency range 10-40 GHz. B.N.Harden, buty→bury and W.J.K.White 154
Automata, nonlinear stochastic learning, design of. R.G.Neville, C.R.Nicol and P.Mars 396
Automata, stochastic learning, design of, using adaptive digital logic elements. R.G.Neville, C.R.Nicol and P.Mars 324
Automaton, modified-estimating, study of, in stationary environments. M.J.Coutts and P.Mars 404
Avalanche photodiodes, absolute noise characterisation of. M.C.Brain 485
Avalanche photodiodes, silicon, temperature dependence of multiplication noise in. H.Kanbe 539
Avalanche photodiodes, very low noise silicon planar. J.J.Goedbloed and E.T.J.M.Smeets 67
Axial-line-current approximation for short cylindrical wires. R.Neri and T.S.M.MacLean 776

B

Backscattering, acoustic, electromagnetic versus, by prolate spheroids. B.P.Sinha 233
Bandpass filter realisation, simple, active inductances using current conveyors and their application in a. R.Nandi 373
Bandpass filter, s.a.w., with -50 dB sidelobes using unweighted i.d.t.s.. P.Sudhakar, A.B.Bhattacharyya and B.Mathur 437
Bandwidth efficient constant-envelope digital signalling with phase-tree demodulation. T.Aulin, N.Rydbeck and C.-E.Sundberg 487
Bandwidth of a dipole near and parallel to a conducting plane. G.Dubost 734
Barrier height, effective, increasing the, of Schottky contacts to n-$In_xGa_{1-x}As$. D.V.Morgan and J.Frey 737
Beamwidth variation with aperture diameter of the choked waveguide feed antenna. K.M.Keen 406
Bias and residual intersymbol interference of of minimum-variance equalisers for digital communication. G.Nicholson and J.P.Norton 678
Binary baseband polar signals in combination with continuous and impulsive noise with i.s.i.. V.K.Jain and S.N.Gupta 82
Binary multiplication, high-speed iterative array for. B.S.Dormido and D.MoA.Canto 742
Bipolar integrated circuits, supply-current analysis (Scan) as a screen for. A.J.Melia 434
Bipolar transistors, epitaxial, in current mode second breakdown, investigation into the survival of. M.Dow and K.I.Nuttall 100
Bipolar transistors, improving the large-signal models of, by dividing the intrinsic base into two lateral sections. H.-M.Rein Errata 350
Bipolar voltage-current convertor, class AB. M.K.N.Rao and J.W.Haslett 762
Bistatic radar measurements of ice-cloud reflectivities in the upper troposphere. R.L.Olsen and U.H.W.Lammers 219
Boolean function, concerning the maximum number of essential prime implicants in a. L.GomezGonzllez 319
'Bootstrapping' in Josephson tunnelling logic circuits. H.Yamada and A.Ishida 300
Boron segregation data for d.m.o.s. devices. P.H.Ladbrooke and M.N.Strudwick 128
Buckling, optical fibre, investigation of, in loose-tube packaging. M.H.Reeve 47

C

C.C.D. image processor demonstration of, for two-dimensional edge detection. G.R.Nudd and P.A.Nygaard 83
C.C.D., linear detection of charge in, with a dual gate. G.S.Hobson, R.Longstone and R.C.Tozer 400
C.C.D. (M.C.C.D.) transversal filter, meander channel. Y.Miyamoto, K.Tanikawa and H.Sei 538
C.C.D. multiplying input technique, a novel. D.V.McCaughan, J.C.White and J.R.Hill 165
C.C.D. programmable filter, analogue, implementation of a 64-point adaptive filter using an. C.F.N.Cowan, J.Mavor and J.W.Arthur 568
C.C.D.S., scratch filter using. A.H.James, G.A.C.Cutler, N.S.Shinn and D.V.McCaughan 691
C.C.O. wide-range monolithic bipolar-j.f.e.t.. F.V.J.Sleeckx and W.M.C.Sansen 259
C.M.O.S. devices fabricated on buried SiO_2 layers formed by oxygen implantation into silicon. K.Izumi, M.Doken and H.Ariyoshi 593
C.W. modelocking of a GaInAsP diode laser. L.A.Glasser 725
Cable, symmetrical star quad, on the optimum ratio of distance between wires to conductor radius of, for digital signal transmission. N.Kojima, M.Ohmura and T.Fuchigami 223
Calculation of reference equivalents and loudness ratings. D.L.Richards 647
Calculation of transmission coefficients for omega signals penetrating into sea water. P.J.D.Gething and A.Mobbs 229
Camera, pyroelectric vidicon chopper, alternative pedestal generation scheme gives flickerfree pictures from a. G.S.Hoeksma 146
capaci→capabi. E.Kohn 786
Capacitance uniformity., Ion Implanted GaAs varactor diodes. N.Toyoda, I.Niikura, Y.Shimura, T.Hozuki, H.Sugibuchi, M.Mihara and T.Hara 152
Carrier profiling of InP. D.L.Lile and D.A.Collins Errata 530
Carrier removal profiles from oxygen implanted GaAs. S.Gecim, B.J.Sealy and K.G.Stephens 306
Cascade synthesis of monolithic crystal filters with transmission zeros at finite frequencies. S.K.S.Lu 45
Cavity end-loaded, circular waveguide, resonances in a, with magnetised ferrite discs. J.M.Hellums and L.E.Davis 479
Cavity, resonant frequencies of a, with a cylindrical hole in a wall of infinite thickness. E.A.Shapoval 445
Channels, nonlinear dispersive data, maximum-likelihood reception on. R.Wood 669
Characteristic material signatures by acoustic microscopy. R.D.Weglein and R.G.Wilson 352
Characteristics of double-groove guide at 3mm wavelength. D.J.Harris and K.W.Lee 726
Charge-coupled device, overlaid. R.M.Barsan 176
Charge-coupled devices, a novel configuration for. R.L.Carroll 217
Charge transfer delay line, of transfer inefficiency in a, on exact compensation of. S.C.Dutta Roy and V.G.Das 115
Chebyshev delay approximation of even degree with constraint at the origin. V.S.Stojanovic and M.D.J.Radmanovic 202
Chemical vapour deposition method, improved, for long-length optical fibre. M.Okada, M.Kawachi and A.Kawana 89
Circuit board routability, printed, an improvement in, using a maze-running algorithm. L.S.Pugh 8
Circuits, d.c. bias, nodal analysis of. J.J.Witkowski 137
Circular waveguide cavity end-loaded, resonances in a, with magnetised ferrite discs. J.M.Hellums and L.E.Davis 479
Circular waveguide, reduced diameter, TE01 attenuation of 90D sharp bend in. C.R.South 66
Circular waveguides, effect of wall thickness on radiation from. G.L.James and K.J.Greene 90
Circular waveguides, ferrite-filled, evanescent modes in. J.M.Hellums and L.E.Davis 476
Circulator, compact optical, for near-infrared region. A.Shibukawa and M.Kobayashi 816
Class AB bipolar voltage-current convertor. M.K.N.Rao and J.W.Haslett 762
Class of optimal recursive Wiener filters. S.S.Reddi 484
Closed formula for the static three-dimensional Green function in microstrip structures. J.R.Mosig 544
Code, (5,6) alternating disparity block, high-density digital magnetic recording using the. M.Davidson and J.L.Machamer 459
Code convertors, high-speed Gray-binary and binary-Gray, using electro-optic light modulators. K.Takizawa and M.Okada 708
Code, new transmission, for digital optical communications. R.Petrovic 541
Code words, minimum-weight, number of, in a product code. R.L.Miller 642
Coded, contour -, binary images, scaling of. P.Zamperoni 608
Codes, improving Reed-Massey threshold, an algorithm for,. Pseudostep orthogonalisation:,. D.McQuilton and M.E.Woodward 355
Coding, error correction, partial correction of transmission errors in Walsh transform image without recourse to. W.C.Wong and R.Steele 298
Colour t.v. broadcasting translator, u.h.f. low-noise GaAs m.e.s.f.e.t. amplifier for. M.Mitama and H.Katoh 319
Combinational circuits, systematic synthesis of, using multiplexers. B.Dormido and D.Canto 588
Comment on Crosstalkless termination of multi-wire cables. Y.Y.Sun 251
Comment on monotonic lowpass filters with maximum selectivity. D.T.Phuc 362
Comment on the use of stochastic approximation for state estimation in discrete nonlinear dynamical systems. D.Sprevak and M.M.Newmann 730
Communication system, application of solitons to. P.L.Chu and T.Whitbread 531
Communications link, 1 Gbit/s fibre-optic, error-rate measurements on a. R.Petschacher, J.Gruber and M.Holz 711
Commutated capacitor bank as a filter resonator. G.Martinelli and M.Salerno 427
Compact optical circulator for near-infrared region. A.Shibukawa and M.Kobayashi 816
Comparator, 25 MHz current to frequency convertor utilising a new type of. K.Schwingenschuh and F.Gross 358
Comparison of electrical profiles from hot and cold implantations of zinc ions into GaAs. S.S.Kular, B.J.Sealy and K.G.Stephens 22
Compensating resistor, single, phase correction in two-integrator loop filters using a. A.M.Soliman and M.Ismail 375
Compensation, active, intermodulation distortion improvement by, in an X-band impatt amplifier. C.S.Aitchison and A.S.Bains 474
Compensation, optimum single-zero lead, of systems having two dominant poles. G.J.Sloggett 111
Complex convolutions using rectangular transforms. N.S.Reddy and V.U.Reddy 458
Computation of optimal piecewise-linear feedback gains for linear regulators. P.J.Fleming 651
Computational efficiency of number-theoretic-transform-implemented finite-impulse-response filter. T.A.Kriz and D.A.Bachman 731
Computer display of vowel quadrilateral with real-time representation of articulation. G.J.Bristow and F.Fallside 107
Computer store enhancement by interchange. D.J.Wheeler 498
Computer studies on the widening of the avalanche zone and the decrease in efficiency of silicon X-band symmetrical double-drift impatt diodes at high current densities. M.Sridharan and S.K.Roy 635
Computing elements, simple method for, of order $2^n n$, where $n|2^p-1$ and $2 \leqslant k \leqslant p+1$, in GF $[(2^p-1)^2]$. I.S.Reed, T.K.Truong and R.L.Miller 697
Computing, fast algorithms for, complex theoretic transforms. I.S.Reed, K.Y.Liu and T.K.Truong Errata 411
Computing the invariant zeros of multivariable systems. Y.Shamash 208
Concerning the maximum number of essential prime implicants in a Boolean function. L.GomezGonzllez 319
Connectivity test for circuit detection. J.P.Char and S.D.Dadheech 566
Contact resistance profiling method, new, for the assessment of III-V alloy multilayer structures. R.C.Goodfellow, A.C.Carter, R.Davis and C.Hill 328
Contrast in reflection acoustic microscopy. H.K.Wickramasinghe 305
Contribution of reflector profile errors to antenna sidelobe radiation. A.B.Harris Errata 454
Control circuit, laser-level, for high bit rate systems using a slope detector. D.W.Smith 775
Convertor, class AB bipolar voltage-current. M.K.N.Rao and J.W.Haslett 762
Convertor, delta-modulation/p.c.m.. N.Kouvaras 660
Convolution by membrane waves. P.Merilainen and M.Luukala 745
Correction system, adaptive difference detection and, for partial correction of transmission errors in linear p.c.m.. R.Steele, K.N.Ngan and D.J.Goodman 381

Correlation, digital, for noise radar systems. J.R.Forrest and D.J.Price 581
Correlation method, optimum, for measurement of noisy transients in solid-state physics experiments. M.S.Hodgart 388
Correlator, s.a.w. monolithic storage, adaptive filter based on. P.M.Grant and G.S.Kino 562
Counting, pulse, low noise charge sensitive, preamplifier for fast. G.Grainger and D.K.Bedford 126
Coupler, Lange, loss and sensitivity of the. R.Horton 391
Coupler, low-loss, Y-, for multimode signle fibres. L.Fiorina, S.Mezzeti and F.Svelto 808
Couplers, fabrication of low-loss 3dB, with multimode optical fibres. Y.Tsujimoto, H.Serizawa, K.Hattori and M.Fukai 157
Couplers, micro-optic 3 dB, two-way transmission experiemtns over a single optical fibre at the same wavelength using. K.Minemura, K.Kobayashi, T.Yanase, R.Ishikawa, M.Shikada, A.Ueki and S.Sugimoto 340
Couplers, star, using fused biconically tapered multimode fibres. E.G.Rawson and A.B.Nafarrate 274
Coupling between two microstrip lines through apertures. M.Kumar 415
Coupling light, realistic efficiency of, from GaAs laser diodes into parabolic -index optical fibres. G.K.Khoe and G.Kuyt 666
Crossovers in microstrip. R.Horton 110
Crosspolarisation:, adaptive cancellation of, experiments with unmodulated signals. P.Delogne and P.Sobieski 770
Crystal filters, monolithic, cascade synthesis of, with transmission zeros at finite frequencies. S.K.S.Lu 45
Crystal resonator, quartz-, thickness-shear stress distributions of the oscillating planoconvex AT-cut. S.Yamagata, K.Yamamoto, I.Fukai and I.Yasuda 450
Current density distribution and equivalent photoconductance of laser-excited microstrip gap structures. W.Platte and K.Moesel 591
Current-measuring shunts, a simple iterative method for overcoming errors due to heating of. C.R.Melbourne and M.R.Barrault 800
Current mode second breakdown, of epitaxial bipolar transistors in, investigation into the survival. M.Dow and K.I.Nuttall 100
Current-tuned GaAs Schottky-barrier impatt diodes for 60-96 GHz operation. R.I.Schwarz and E.Bonek 812
Cutoff frequencies of a parabolic-core W-type fibre. A.Kumar, R.Chandra, R.A.Sammut and A.K.Ghatak 676
Cyclotron and upper hybrid resonance frequency in reflected pulse by magnetoplasma half space. B.V.Stanic 397

D

D.A. convertor, 10-bit monolithic high-speed. A.Barna, J.W.Grace and N.L.Rhodes 542
Data channels, nonlinear dispersive, maximum-likelihood reception on. R.Wood 669
Data-window circuit, sum-cosine, measured performance of a. M.Trivedi and K.V.Lever 564
Decoding, -encoding, optical fibre network. E.Marom and O.G.Ramer 48
Decoding, optimum, of M-ary polarisation modulated laser signal. N.Malaviya 104
Decoding, soft decision, of transmission codes. M.R.L.Hodges and E.V.Jones 582
Deep traps in ideal n-InP Schottky diodes. A.M.White, A.J.Grant and B.Day 409
Deep traps in polysilicon solar cells. A.Criado, B.Alonso and J.Piqueras 622
Defects in SiO_2, spatial distribution of. H.A.Mughal, W.Eccleston and R.A.Stuart 761
Degradation in short-wavelength (AlGa)As light-emitting diodes. I.Ladany and H.Kressel 407
Delay line, a membrane wave. M.Luukala and P.Merilainen 123
Delay line, charge transfer, of transfer inefficiency in a, on eaxct compensation of. S.C.Dutta Roy and V.G.Das 115
Delay time, propagation, of i.i.l. at low current levels. J.Lohstroh and N.C.de Trove 705
Delta-modulated signals, multiplier for. D.Lagoyannis 615
Delta-modulation/p.c.m. convertor. N.Kouvaras 660
Demodulation, phase-tree, bandwidth efficient constant-envelope digital signalling with. T.Aulin, N.Rydbeck and C.-E.Sundberg 487
Demonstration of a c.c.d. image processor for two-dimensional edge detection. G.R.Nudd and P.A.Nygaard 83
Depolarisation due to snow at 11.6 GHz. I.J.Dilworth and B.G.Evans 315
Depolarisation of the linearly and circularly polarised 11.6, 11.8 and 14.5 GHz OTS signals. R.G.Howell, J.Thirlwell and R.R.Bell 794
Depolarisation, zero, on symmetrical corrugated reflectors with. G.L.James and B.MacA.Thomas 210
Design-centring, statistical, for electrical circuits. R.S.Soin and R.Spence 772
Design considerations for lowpass and highpass all-pole f.d.n.r. networks. R.E.Massara 225
Design mentod for monolithic analogue filters. R.Schaumann and J.R.Brand 710
Design of a temperature stable surface acoustic wave device on silicon. G.Cambon and J.Attal 536
Design of high-gain state-feedback controllers for linear multivariable systems. B.Porter 256
Design of nonlinear stochastic learning automata. R.G.Neville, C.R.Nicol and P.Mars 396
Design of stochastic learning automata using adaptive digital logic elements. R.G.Neville, C.R.Nicol and P.Mars 324
Detection, adaptive difference, and correction system for partial correction of transmission errors in linear p.c.m.. R.Steele, K.N.Ngan and D.J.Goodman 381
Detector arrays, planar indium-diffused lead telluride. C.H.Gooch, H.A.Tarry, R.C.Bottomley, M.G.Astles and B.J.Waldock 209
Determination of arbitrary doping profile in p-n junctions. D.A.Tjapkin and V.B.Milanovic 639
Determination of scattering widths of a long thin wire using an open resonator. C.M.Tang and A.L.Cullen 245
Determination of the sinusoidal-input describing functions for sampled-data systems having multivalued nonlinearities. C.P.Lewis 556
Device, lamb-wave, with three operation modes. K.Toda and Y.Yamashita 747
Devices, interacting two-state m.o.s., logic functions using. M.M.Darwish and K.Board 482
Dielectric-constant step of $InP/In_{1-x}Ga_xP_{1-y}$. G.D.Henshall, P.D.Greene, G.H.B.Thompson and P.R.Selway 796
Dielectric sphere loaded horns, radiation from. A.G.Martin 17
Dielectric spheres, measurement of the extinction crosssection of, using an open resonator. D.L.Bryant and L.J.Auchterlonie 475
Dielectric waveguide system, novel, performance of a, for microwave power utilisation by divers. D.Pavlidis and H.L.Hartnagel 262
Differential amplifier, novel, m.o.s., for sampled-data applications. P.B.Denyer and J.Mavor 1
Diffraction of a dipole field by a perfectly conducting thick half-plate. A.Kinase 236
Diffusion profile of stripe optical waveguides formed by ion exchange. C.D.W.Wilkinson and R.Walker 599
Digital 2-dimensional all-pass filters, least-squares algorithm for the design of. G.L.Sicuranza 645
Digital-analogue, precision fast, some proposals for improved forms of, and analogue-digital converters. J.R.Stockton and R.B.D.Knight 790
Digital communication, bias and residual intersymbol interference of minimum-variance equalisers for. G.Nicholson and J.P.Norton 678
Digital convolutions, implementation of Winograd's algorithm in modular arithmetic for. N.Sridhar.Reddy and V.Umapathi.Reddy 228
Digital correlation for noise radar systems. J.R.Forrest and D.J.Price 581
Digital filter, 2-dimensional f.i.r., realisation of a, using separable filters. P.Karivaratharajan and M.N.S.Swamy 249
Digital filters, nonrecursive, performance comparisons for, with nonlinear phase characteristics. M.A-Razzak and L.G.Cuthbert 370
Digital frequency synthesiser, fast. M.J.Underhill, P.A.Jordan and M.Sarhadi 342
Digital magnetic recording, high-density, using the (5,6) alternating disparity block code. M.Davidson and J.L.Machamer 459
Digital optical communications, new transmission code for. R.Petrovic 541
Digital signal transmission, on the optimum ratio of distance between wires to conductor radius of symmetrical star quad cable for. N.Kojima, M.Ohmura and T.Fuchigami 223
Digital signalling, bandwidth efficient constant-envelope, with phase-tree demodulation. T.Aulin, N.Rydbeck and C.-E.Sundberg 487
Digital signals, nonrandom, effect of, on p.c.m. frame synchronisation. R.J.S.Bates 296
Diode multiplexer in the multi-Gbit/s range. U.Barabas, U.Langmann and B.G.Bosch 62
Diode reverse-bias switching, *p-i-n*, via inductive discharging. C.J.Georgopoulos and V.Makios 723
Dipole, bandwidth of a, near and parallel to a conducting plane. G.Dubost 734
Direct determination of feedback shift register connections for delayed m-sequences generation. D.G.Maritsas and A.Bounas 308
Direct measurement of wavelength dispersion in optical fibres-difference method. K.Daikoku and A.Sugimura 149
Direct modulation of InGaAsP/InP double heterostructure lasers. S.Akiba, K.Sakai and T.Yamamoto 197
Directional-coupler switch, GaAs rib-waveguide, with Schottky barriers. H.Kawaguchi 387
Directional couplers, short-duration pulses for time-domain spectrometry using. R.J.Hawkins 201
Discrete linear systems, simple method of designing suboptimal dynamic controllers for. C.S.Berger 4
Discrete nonlinear dynamical systems, error bounds on stochastic approximates in. O.Ibidapo-Obe 230
Discrete nonlinear dynamical systems, the use of stochastic approximation for state estimation in, comment on. D.Sprevak and M.M.Newmann 730
Discrete radiation from curved single-mode fibres: a comparison of theories. R.A.Sammut 103
Discrete regulator problem, solution of the, using the sign matrix function. A.Halbersberg and Y.Bar-Ness 286
Discrete-time linear systems, multivariable, algorithm for identification of. M.Brucoli, B.Maione and F.Torelli 313
Discriminators:, multimode optical-fibre phase modulators and, I-Theory. S.A.Kingsley and D.E.N.Davies 322
Discriminators:, multimode optical fibre phase modulators and, II-experiments. S.A.Kingsley 335
Dispersion, low pulse, optical waveguides with, over an extended spectral range. R.Olshansky 330
Dispersion, modal, wavelength dependence of, in graded index optical fibres. L.Jeunhomme, J.P.Pocholle and J.Raffy 364
Dispersion, wavelength, direct measurement of, in optical fibres -difference method. K.Daikoku and A.Sugimura 149
Dispersion, zero-material-, region, pulse delay measurements in the, for germanium- and phosphorus-doped silica fibres. C.Lin, L.G.Cohen, W.G.French and V.A.Foertmeyer 170
Dispersion, zero-mode, in singlemode fibres. W.A.Gambling, H.Matsumura and C.M.Ragdale 618
Dispersive, -wavelength, properties of glasses for optical fibres: the germania enigma. M.J.Adams, D.N.Payne, F.M.E.Sladen and A.H.Hartog 703
Displays, multiplexed liquid crystal, a novel method of temperature compensation for. C.Hilsum, R.J.Holden and E.P.Raynes 430
Distortion-induced d.c. offset analysis using Volterra-Wiener series approach. A.Borys 817
Distortion, intermodulation, analysis of, in GaAs m.e.s.f.e.t. amplifiers. R.A.Minasian 590
Distributed multiplexing. D.N.Riches 516
Domain, high-field, maximum electric field in. M.Shur 521
Doping profile, arbitrary, determination of, in p-n junctions. D.A.Tjapkin and V.B.Milanovic 639
Doping profiles, optimised, for speed-up of GaAs m.e.s.f.e.t.s.. K.Kurumada 481
Doping profiles, optimum, in L.S.A. diodes, use of current controlled GaAs L.P.E. for. D.J.Lawrence and L.F.Eastman 77
Doubly fed coaxial antennas. F.Rahman and T.S.M.MacLean 178
Downconvertor, low-distortion, using varactor diodes. G.Ohm 303
Drill-rod telemetry, electromagnetic basis of. D.A.Hill and J.R.Wait 532

E

Eddy-current magnetic suspension. J.W.Finch and H.Joyce 442
eed, of the performance of. O.J.Downing and P.T.Johnson 238
Effect of neutron and gamma irradiation on the low-frequency noise in GaAs m.e.s.f.e.t.s.. S.B.Moghe, R.J.Gutmann, M.J.Chudzicki and J.M.Borrego 637
Effect of nonrandom digital signals on p.c.m. frame synchronisation. R.J.S.Bates 296
Effect of rain in the near field of an antenna. D.P.Haworth, N.J.McEwan and P.A.Watson 94
Effect of wall thickness on radiation from circular waveguides. G.L.James and K.J.Greene 90
Efficient codes for single error detection and partial single error correction. A.H.Bhatt and L.L.Kinney 321
Eigenvalue sensitivity method for optimal stabilisation of linear systems. V.Guruprasada Rau 59
Electric field, maximum, in high-field domain. M.Shur 521
Electric/magnetic field ratios of ground waves in a realistic terrain. J.H.Causebrook 614
Electrical profiles from zinc implanted GaAs. S.S.Kular, B.J.Sealy and K.G.Stephens 2
Electrical properties of laser-annealed donor-implanted GaAs. B.J.Sealy, S.S.Kular, K.G.Stephens, R.Croft and A.Palmer 720
Electrically erasable f.a.m.o.s. memory structure using avalanche injection from floating gate. H.C.Card 674
Electro-optic light modulators, high-speed Gray-binary and binary-Gray code convertors using. K.Takizawa and M.Okada 708

Electro-optic modulators, zinc sulphide leaky waveguide, limitations. P.L.Jones and D.R.Cotton 10
Electrodes, circular, 1/f noise and resistance between. L.K.J.Vandamme and J.C.F.Groot 30
Electromagnetic basis of drill-rod telemetry. D.A.Hill and J.R.Wait 532
Electromagnetic, high-frequency, generation of, and acoustic oscillations in a semiconductor in low-frequency electric field. A.S.Bugaev, Y.V.Gulyaev and G.D.Mansfeld 403
Electromagnetic response of an anisotropic cylindrical shell. J.R.Wait 750
Electromagnetic versus acoustic backscattering by prolate spheroids. B.P.Sinha 233
Electromagnetic wave, reflection of, from a time-varying medium. S.Kozaki 826
Electron-beam lithography, line width control in. J.C.H.Phang and H.Ahmed 382
Electron microscope energy loss spectra, transmission, use of silicon self-scanned linear photodiode arrays for the direct display of. D.G.Jenkins, C.J.Rossouw, B.L.Jones, G.R.Booker and P.W.Fry 174
Electronic current-sensing systems, e.h.v., transmission of microwave signals through an e.h.v. insulator for application to. D.V.Otto 692
Electrostatically controlled wire-mesh antenna. J.H.Lang, J.R.Gersh and D.H.Staelin 655
Encoded speech, time. R.A.King and W.Gosling 456
Encoding-decoding optical fibre network. E.Marom and O.G.Ramer 48
Energy loss spectra, transmission electron microscope, use of silicon self-scanned linear photodiode arrays for the direct display of. D.G.Jenkins, C.J.Rossouw, B.L.Jones, G.R.Booker and P.W.Fry 174
Enhancement-mode ion -implanted InP f.e.t.s.. K.R.Gleason, H.B.Deitrich, M.L.Bark and R.L.Henry 643
Envelope-constrained time-domain deconvolution for transversal-filter equalisers. D.Preis 37
Envelope probability density function of the sum of signal, noise and interference. I.M.Kostic 490
Epitaxy, molecular-beam, high-power GaAs f.e.t. prepared by. M.Wataze, Y.Mitsui, T.Shimanoe, M.Nakatani and S.Mitsui 759
Epitaxy, molecular-beam, p^+-n hyperabrupt GaAs varactors grown by. D.W.Covington and W.H.Hicklin 752
Equal-valued earthed-capacitor realisation of a third-order lowpass Butterworth characteristic using current conveyors. R.Nandi 699
Equalisers, minimum-variance, bias and residual intersymbol interference of, for digital communication. G.Nicholson and J.P.Norton 678
Equalisers, transversal-filtwe, envelope-constrained time-domain deconvolution for. D.Preis 37
Equivalent circuit using c.c. II, Ford-Girling. A.M.Soliman 721
Error bounds on stochastic approximates in discrete nonlinear dynamical systems. O.Ibidapo-Obe 230
Error characteristic, l.m.s., on lowpass filters having multiple pairs of imaginary-axis zeros at two distinct points in the stopband with. D.T.Phuc and J.Attikiouzel 706
Error correction coding, partial correction of transmission errors in Walsh transform image without recourse to. W.C.Wong and R.Steele 298
Error correction, microcomputer, adaptive instantaneous pitch detector with. N.R.Malik and S.C.Huang 109
Error detection, single, efficient codes for, and partial single error correction. A.H.Bhatt and L.L.Kinney 321
Error-rate measurements on a 1Gbit/s fibre-optic communications link. R.Petschacher, J.Gruber and M.Holz 711
Estimation, sliding mean edge. G.E.Ford 610
Evaluation of nonperiodic autocorrelation parameters for maximal-length sequences. R.Skaug 333
Evanescent modes in ferrite-filled circular waveguide. J.M.Hellums and L.E.Davis 476
Exact field expressions for guided modes of a general class of graded-index fibres. G.Jacobsen 464
Examination of grain boundaries in polycrystalline solar cells using a scanning optical microscope. J.N.Gannaway and T.Wilson 507
Exchange in glass, electric-field controlled ion, optical waveguides fabricated by. G.H.Chartier, P.Jaussaud, A.D.de Oliveira and O.Parriaux 132
expier→experi unmodulated signals. P.Delogne and P.Sobieski 770
Explicit modelling of antennas with sparse-ground screens. E.K.Miller, J.N.Brittingham and J.T.Okada 627

F

F.A.M.O.S. memory structure, electrically erasable, using avalanche injection from floating gate. H.C.Card 674
F.E.T., high-power GaAs, prepared by molecular-beam epitaxy. M.Wataze, Y.Mitsui, T.Shimanoe, M.Nakatani and S.Mitsui 759
F.E.T., M.E.S., amplifiers, GaAs, analysis of intermodulation distortion in. R.A.Minasian 590
F.E.T., M.E.S., GaAs, technology and characteristics for optical communication systems. J.J.M.Dekkers, W.Filensky and H.Beneking 272
F.E.T., M.E.S., InP, performance, substrate dependence of. H.Morkoc, J.T.Andrews and S.B.Mhyder 715
F.E.T., M.E.S., microwave, some effects of wave propagation in the gate of a. P.H.Ladbrooke 21
F.E.T., M.O.S. enhancement-mode GaAs microwave, new structure of. T.Mimura, K.Odani, N.Yokoyama and M.Fukuta 500
F.E.T., M.O.S., fabrication of a, with 'spoxide' as the gate densith→density. U.K.Chakrabarti 754
F.E.T., microwave $In_xGa_{1-x}As_yP_{1-y}$/InP. H.Morkoc, J.T.Andrews, Y.M.Houng, R.Sankaran, S.G.Bandy and G.A.Antypas 448
F.E.T. mixer, modelling of an. P.Harrop and T.A.C.M.Claasen 369
F.E.T. oscillation frequency domain solution. C.M.Krowne 561
F.E.T. power oscillator, novel. P.C.Wade 672
F.E.T.S., enhancement-mode ion-implanted InP. K.R.Gleason, H.B.Deitrich, M.L.Bark and R.L.Henry 643
F.E.T.S., M.E.S., GaAs, on the power-handling capability of. E.Kohn 786
F.E.T.S., M.E.S., GaAs, optimised doping profiles for speed-up of. K.Kurumada 481
F.E.T.S., M.E.S., submicrometre GaAs, high-yield self-alignment method for. G.P.Donzelli 523
F.E.T.S., m.o.s., implaned Si, for high-speed applications. U.Niggebrugge, C.Tsironis, W.Filensky, P.Balk and H.Beneking 690
F.E.T., Tungsten/gold gate GaAs microwave. H.Morkoc, J.Andrews, R.Sankaran and J.H.Dully 514
Fabrication of a m.o.s.f.e.t. with 'spoxide' as the gate dielectric having low interface state density. U.K.Chakrabarti 754
Fabrication of low-loss 3dB couplers with multimode optical fibres. Y.Tsujimoto, H.Serizawa, K.Hattori and M.Fukai 157
Fading on earth satellite paths at 11.5 GHz, annual and annual-worst-month statistics of. G.Brussard and P.A.Watson 278
Fast algorithm for computing a primitive 2^{p+1}pth root of unity in GF[$(2^p-1)^2$]. I.S.Reed, T.K.Truong and R.L.Miller 493
Fast algorithm for computing complex number-theoretic transforms. I.S.Reed and T.K.Truong 231
Fast algorithm for computing complex theoretic transforms. I.S.Reed, K.Y.Liu and T.K.Truong Errata 411
Fast d.f.t. algorithm, a, using complex integer transforms. I.S.Reed and T.K.Truong 191
Fast digital frequency synthesiser. M.J.Underhill, P.A.Jordan and M.Sarhadi 342
Fast-Fourier-transform processor using s.a.w. chirp filters. M.A.Jack 634
Fast s.a.w.-based discrete Fourier transformer. J.B.G.Roberts, B.J.Darby, R.A.Bale and R.Eames 783
Fast-sampling frequency meter. M.J.Underhill, M.Sarhadi and C.S.Aitchison 366
Fault detection in sequential machines with increased fault coverage. S.R.Das and A.Bhattacharyya 28
Fed, insular-image guide-, short backfire antenna. R.N.Simons and D.T.Shahani 644
Feed position, optimisation of, and improved profile mapping of a reflector antenna from microwave holographic measurements. M.P.Godwin, A.P.Anderson and J.C.Bennett Errata 318
Feed radiation patterns modified by a dichroic plate. P.A.Langsford and E.A.Parker 736
Feedback gains, optimal piecewise-linear, computation of, for linear regulators. P.J.Fleming 651
Feedback, output, on pole placement using. M.Seraji 739
Feedback, state, new approach to aggregate model formulation through. C.H.Orr and D.J.Hlolding 679
Ferrite discs, magnetised, resonances in a circular waveguide cavity end-loaded with. J.M.Hellums and L.E.Davis 479
Ferrite-filled circular waveguide, evanescent modes in. J.M.Hellums and L.E.Davis 476
Fibre bundle comprising nineteen optical fibres drawn from the double crucible. H.A.Aulich, J.G.Grabmaier and K.H.Eisenrith 347
Fibre connectors, single-mode. N.Shimuzu and H.Tsuchiya Errata 682
Fibre-guided coherent light, interaction of high-frequency sound with. D.Howard and T.J.Hall 620
Fibre, in a curved single-mode, field deformation. W.A.Gambling, H.Matsumura and C.M.Ragdale 130
Fibre index profile determination by near field, intensity profile distortion due to resolution limitation in. J.P.Hazan 158
Fibre-optic sensors, semipassive, fibredyne systems for passive or. S.A.Kingsley Errata 530
Fibre-optic transmission experiments, wavelength division two-way, using micro-optic duplexers. S.Sugimoto, K.Minemura, K.Kobayashi, M.Shikada, H.Nomura, K.Kaede, A.Ueki and S.Matsushita 15
Fibre, -optical, end, hand-held tool for, preparation. J.E.Fulenwider and M.L.Dakss Errata 46
Fibre-optical strain gauge. M.Johnson and R.Ulrich 432
Fibre, parabolic-core W-type, cutoff frequencies of a. A.Kumar, R.Chandra, R.A.Sammut and A.K.Ghatak 676
Fibre, single-mode, measurement of, core-cladding concentricity. A.R.Tynes, R.M.Derosier and W.G.French 113
Fibre structure, the influence of a, on optical loss in a graded-index fibre. N.Kashima, N.Uchida, N.Susa and S.Seikai 78
Fibre transmission, low loss, of high speed pulse signals at 1.29 μm wavelength. M.Saruwatari, K.Asatani, Jun-Ichi.Yamada, I.Hatakeyama, K.Sugiyama and T.Kimura 187
Fibre waveguides, power attenuation in bent multimode step-index slab and. J.D.Love and C.Winkler 32
Fibre waveguides, power attenuation in bent paraboilic-index slab and. C.Winkler, J.D.Love and A.K.Ghatak 570
Fibredyne systems for passive or semipassive fibre-optic sensors. S.A.Kingsley Errata 530
Fibres: curved single-mode, discrete radiation from, a comparison of theories. R.A.Sammut 103
Fibres, ethyl-vinyl-acetate-coated laser-drawn silica, with tensile strengths > 3.5 GN/m^2 (500 kp.s.i.) in > 3km. lengths and. T.J.Miller, A.C.Jun.Hart, W.I.Jun.Vroom and M.J.Bowden 603
Fibres, furnace-drawn silica, with tensile strengths > 3.5 (500 (kp.s i.) in 1km lengths. F.V.DiMarcello and A.C.Hart.Jr. 578
Fibres, fused biconically tapered multimode, star couplers using. E.G.Rawson and A.B.Nafarrate 274
Fibres, graded-index, exact field expressions for guided modes of a general class of. G.Jacobsen 464
Fibres, multicomponent glass, with high numerical aperture. S.Takahashi, S.Mitachi, S.Shibata and M.Yasu 280
Fibres, multimode single, low-loss Y-coupler for. L.Fiorina, S.Mezzeti and F.Svelto 808
Fibres, phosphorus-doped silica, pulse delay measurements in the zero-material-dispersion region for germanium- and. C.Lin, L.G.Cohen, W.G.French and V.A.Foertmeyer 170
Fibres, single mode, influence of noncircular core on the polarisation performance of. V.Ramaswamy and W.G.French 143
Fibres, single-mode, joint loss in. W.A.Gambling, H.Matsumura and C.M.Ragdale 491
Fibres, single-mode, jointing loss in. W.A.Gambling, H.Matsumura and A.G.Cowley 54
Fibres, single-mode, zero-mode dispersion in. W.A.Gambling, H.Matsumura and C.M.Ragdale 618
Fibres, step-index, sinusoidal microbending loss of HE_{11}-mode in. J.-T.Horng 528
Field component, horizontal electric-, short thin-wire antenna to measure the, at v.l.f. on the earth's surface. D.V.Thiel 804
Field deformation in a curved single-mode fibre. W.A.Gambling, H.Matsumura and C.M.Ragdale 130
Filter, 64-point adaptive, implementation of a, using an analogue c.c.d. programmable filter. C.F.N.Cowan, J.Mavor and J.W.Arthur 568
Filter, a c.t.d. adaptive inverse. D.Corl 60
Filter design, inductance simulation and, using a single-pole amplifier approximation. J.Allen, M.Gumussoy and A.G.J.Holt 629
Filter, high-performance digitally programmable analogue transversal. D.Roy and P.Menard 671
Filter, meander channel C.C.D. (M.C.C.D.) transversal. Y.Miyamoto, K.Tanikawa and H.Sei 538
Filter, number-theoretic-transform-implemented finite-impulse-response, computational efficiency of. T.A.Kriz and D.A.Bachman 731
Filter resonator, commutated capacitor bank as a. G.Martinelli and M.Salerno 427
Filter, -transversal, equalisers, envelope-constrained time-domain deconvolution for. D.Preis 37
Filters, digital 2-dimensional allpass, least-squares algorithm for the design of. G.L.Sicuranza 645
Filters, monolithic analogue, design method for. R.Schaumann and J.R.Brand 710
Filters, multirate multiplierless discrete ladder. L.T.Bruton and R.H.Khan 814

Filters, notch, relationship between Kalman and, used in dynamic ship positioning systems. M.J.Grimble 399
Filters, optimal recursive Wiener, class of. S.S.Reddi 484
Filters, recursive, a sequential regression algorithm for. D.Parikh and N.Ahmed 266
Filters, s.a.w. chirp, fast-Fourier-transform processor using. M.A.Jack 634
Filters, selective, using least-mean-square approximation technique. M.V.Popovich 596
Filters, transitional Butterworth-Chebyshev. P.Thajchayapong, F.Cheevasuvit and S.Manapee 680
Filters, transitional Butterworth-Chebyshev, generalisations of m.f.m.b.o. and. D.T.Phuc and J.Attikiouzel 668
Filters, transitional Butterworth-Chebyshev. S.C.Dutta Roy and P.Varanasi 179
Filters, two-integrator loop, phase correction in, using a single compensator resistor. A.M.Soliman and M.Ismail 375
Finite-element method three-dimensional, for solving electromagnetic problems. R.L.Ferrari and G.L.Maile 467
Flip-flops, D, gateless synchronous counters with. A.R.Vaquero and J.Aguilo 496
Ford-Girling equivalent circuit using c.c. II. A.M.Soliman 721
Formula giving single-mode limit of optical fibre having arbitrary refractive-index profile. K.Hotate and T.Okoshi 246
Fourier transformer, fast s.a.w.-based discrete. J.B.G.Roberts, B.J.Darby, R.A.Bale and R.Eames 783
Fractional spontaneous emission coupled into AlGaAs laser mode. J.Ito and S.Machida 693
Frequency convertor, a 14/12 GHz f.e.t.. P.Bura 255
Frequency convertor utilising a new type of comparator, 25 MHz current to. K.Schwingenschuh and F.Gross 358
Frequency meter, fast-sampling. M.J.Underhill, M.Sarhadi and C.S.Aitchison 366
Frequency multipliers, magnetoresistive class-C. V.Dey and D.Midgley 623
Frequency response of 2-dimensional digital filters. K.P.Prasad and P.S.Reddy Errata 318
Frequency responses, transient and, of systems with time delays. M.J.Underhill 284
Frequency synthesiser, fast digital. M.J.Underhill, P.A.Jordan and M.Sarhadi 342
Furnace-drawn silica fibres with tensile strengths >3.5 GN/m^2 (500 kp.s.i.)in 1km lengths. F.V.DiMarcello and A.C.Hart,Jr. 578

G

GaAs, a new technique for device compatible anodic oxidation of. H.Tokuda, H.Yokomizo, Y.Adachi, T.Ikoma and J.Frey 163
GaAs, amorphous-layer formation in, by ion implantation. Min-Shyong Lin 695
GaAs and GaP, a new method of low-temperature zinc diffusion into, using anodic oxides. T.Sakai, T.Suzuki and H.Hasegawa 248
GaAs, comparison of electrical profiles from hot and cold implantations of zinc ions into. S.S.Kular, B.J.Sealy and K.G.Stephens 22
GaAs, donor-implanted, electrical properties of laser-annealed. B.J.Sealy, S.S.Kular, K.G.Stephens, R.Croft and A.Palmer 720
GaAs f.e.t. , high-power, prepared by molecular-beam epitaxy. M.Wataze, Y.Mitsui, T.Shimanoe, M.Nakatani and S.Mitsui 759
GaAs Hall-effect devices fabricated by ion implanatation technique. T.Inada, T.Ohkubo, S.Kato, M.Kitahara, Y.Kanda and T.Hara 503
GaAs, in, switching conduction in ion-irradiated layers. A.J.N.Houghton 102
GaAs lasers, room-temperature, modulation of at X-band frequencies. M.R.Lakshminaravana, R.G.Hunsperger and L.D.Partain 640
GaAs m.a.o.s.f.e.t. memory transistor. B.Bayraktaroglu, A.Colquhoun and H.L.Hartnagel 19
GaAs m.e.s.f.e.t. technology and characteristics for optical communication systems. J.J.M.Dekkers, W.Filensky and H.Beneking 272
GaAs microwave m.o.s.f.e.t., enhancement-mode, new structure of. T.Mimura, K.Odani, N.Yokoyama and M.Fukuta 500
GaAs, modification of zinc diffusion profiles in, by proton irradiation. A.J.Houghton, B.Tuck and K.G.Stephens 185
GaAs, oxygen implanted, carrier removal profiles from. S.Gecim, B.J.Sealy and K.G.Stephens 306
GaAs rib-waveguide directional-coupler switch with Schottky barriers. H.Kawaguchi 387
GaAs Schotk Schottky-barrier diodes, ideal, low-frequency noise in. M.J.Sisson, A.M.Hansom, A.J.Grant, A.M.White and B.Day 662
GaAs varactor diodes for u.h.f. tv tuners fabricated by ion implantation. I.Niikura, N.Toyoda, Y.Shimura, S.Yokoyama, M.Mihara, T.Hayashi and T.Hara 9
GaAs varactors, p+-n hyperabrupt, grown by molecular-beam epitaxy. D.W.Covington and W.H.Hicklin 752
GaAs, zinc implanted, electrical profiles from. S.S.Kular, B.J.Sealy and K.G.Stephens 2
Gamma irradiation, effect of neutron and, on the low-frequency noise in GaAs m.e.s.f.e.t.s.. -S.B.Moghe, R.J.Gutmann, M.J.Chudzicki and J.M.Borrego 637
Gate GaAs microwave f.e.t., Tungsten/gold. H.Morkoc, J.Andrews, R.Sankaran and J.H.Dully 514
Gateless synchronous counters with D flip-flops. A.R.Vaquero and J.Aguilo 496
Gates, three-valued c.m.o.s. cycling. H.T.Mouftah and K.C.Smith 36
Gates, three-valued, c.m.o.s. cycling, realisation of. J.M.Carmona, J.L.Huertas and J.I.Acha 288
General analysis of nonmonotonic lowpass filters having multiple pairs of imaginary-axis zeros with weighted least-mean-square error characteristic. D.T.Phuc and J.Attikiouzel 600
Generalisation of m.f.m.b.o. and transitional Butterworth-Chebyshev filters. D.T.Phuc and J.Attikiouzel 668
Generalised analysis of nonmonotonic lowpass filters with minimum power loss characteristic. D.T.Phuc and J.Attikiouzel 359
Generalised disturbance adaptive optimal regulator. S.Mukhopadhyay 820
Generating precise triangular waves, simplified method for. R.Genin, C.Jezequel and J.Genin 162
Generation of high-frequency electromagnetic and acoustic oscillations in a semiconductor in low-frequency electric field. A.S.Bugaev, Y.V.Gulyaev and G.D.Mansfeld 403
Generators, resonant, long-range-interaction, nonlinear theory of. A.A.Shmat'ko, O.A.Tretikov and D.M.Vavriv Errata 46
Geometry of waveguides in a dichroic secondary mirror. R.J.Langley and E.A.Parker 443
Glass fibre, low loss and low OH content soda-lime-silica. S.Takahashi, S.Shibata and M.Yasu 151
Glasses, lightguide, material dispersion in. J.W.Fleming 326
Goos-Hanchen shift for leaky rays on step-index waveguides. J.D.Love and C.Winkler 379
Graph technique, flow-, analysis of active networks using. A.Cichocki and S.Osowski 227
Gray scale for scanning acoustic microscopy. R.D.Weglein 656
Green function, static three-dimensional, closed formula for the, in microstrip stuctures. J.R.Mosig 544
Groove guide propagation characteristics at 3mm wavelenth. D.J.Harris and K.W.Lee 101
Guide, double-groove, characteristics of, at 3mm wavelength. D.J.Harris and K.W.Lee 726
Guide propagation, groove, characteristics at 3mm wavelength. D.J.Harris and K.W.Lee 101
Guided modes of a four-layer optical waveguide with a metal buffer. I.Moshkun, T.J.M.Boyd and R.H.C.Newton 587
Gunn-effect, 20ps/Gate, high-speed carry finding device. N.Hashizume, S.Kataoka and K.Tomizawa 91
Gyrators, switched-capacitor simulation of grounded inductors and. B.J.Hosticka and G.S.Moschytz 788

H

Hall-effect devices, GaAs, fabricated by ion-implantation technique. T.Inada, T.Ohkubo, S.Kato, M.Kitahara, Y.Kanda and T.Hara 503
Hand-held tool for optical-fibre end preparation. J.E.Fulenwider and M.L.Dakss Errata 46
High-accuracy extraction of buried-channel m.o.s., transistor threshold voltages. L.Gabler, B.Hoefflinger, J.Schneider and G.Zimmer 23
High-density digital magnetic recording using the (5,6) alternating disparity block code. M.Davidson and J.L.Machamer 459
High efficiency pulsed GaAs Read impatt diodes. T.L.Hierl, J.J.Berenz, J.Kinoshita and I.V.Zubeck 155
High-performance digitally programmable analogue transversal filter. D.Roy and P.Menard 671
High-power 11 GHz amplifier using high-efficiency impatt diodes. W.Thorpe and P.Huish 508
High-power GaAs f.e.t. prepared by molecular-beam epitaxy. M.Wataze, Y.Mitsui, T.Shimanoe, M.Nakatani and S.Mitsui 759
High-speed analogue multiplexer using s.a.w. technology. T.M.Reeder, G.K.Montress and T.W.Grudkowski 756
High-speed generation of long m-sequences. G.H.Tomlinson and P.Galvin 212
High-speed Gray-binary and binary-Gray code convertors using electro-optic light modulators. K.Takizawa and M.Okada 708
High-speed iterative array for binary multiplication. B.S.Dormido and D.M°A.Canto 742
High stability acousto-optical devices using bulk acoustic waves in TeO_2. V.V.Proklov, S.N.Antonov and M.Y.Mesh 535
High-yield self-alignment method for submicrometre GaAs m.e.s.f.e.t.s.. G.P.Donzelli 523
Highpass all-pole f.d.n.r. networks, lowpass and, design considerations for. R.E.Massara 225
Holograms, volume, a note on. M.P.Jordan and L.Solymar 271
Hydraulic pressure dependence of optical loss in jacketed optical fibre. Y.Katsuyama, S.Mochizuki, T.Yashiro and Y.Ishida 372

I

I.D.T. design, simplified, redefined element factor for. S.Datta and B.J.Hungsinger 744
I.I.L., propagation delay time of, at low current levels. J.Lohstroh and N.C.de Trove 705
Ice-cloud reflectivities, bistatis radar measurements of, in the upper troposphere. R.L.Olsen and U.H.W.Lammers 219
Identification, algorithm for, of multivariable discrete-time linear systems. M.Brucoli, B.Maione and F.Torelli 313
Identification problem, state-parameter, on the use of stochastic approximation in the. D.Sprevak and M.M.Newmann 351
Image scanning, optical, by electronic control of surface acoustic wave attenuation in CdS. Z.Ueda, J.Shirefuji and Y.Inuishi 26
Images, contour-coded binary, scaling of. P.Zamperoni 608
Impact ionisation ratio in $In_{0.43}Ga_{0.27}As_{0.57}P_{0.43}$. M.Ito, T.Kaneda, K.Nakajima, Y.Toyoma, T.Yamaoka and T.Kotani 418
Impatt amplifier, X-band, intermodulation distortion improvement by active compensation in an. C.S.Aitchison and A.S.Bains 474
Impatt diodes, current-tuned GaAs Schottky-barrier, for 60-96 GHz operation. R.I.Schwarz and E.Bonek 812
Impatt diodes, high efficiency pulsed GaAs Read. T.L.Hierl, J.J.Berenz, J.Kinoshita and I.V.Zubeck 155
Impatt diodes, highefficiency, high-power 11 GHz amplifier using. W.Thorpe and P.Huish 508
Impatt diodes, ion-implanted p-n junction indium-phosphide. J.J.Berenz, F.B.Fank and T.L.lHierl 683
Impatt diodes, silicon X-band symmetrical double-drift, computer studies on the widening of the avalanche zone and the decrease in efficiency of, at high current densities. M.Sridharan and S.K.Roy 635
Impatt oscillator, a loop phase-locked 74 GHz, usable for precise spectroscopy to the 500 GHz region. D.J.E.Knight 451
Impatt oscillator, X-band, initial observations of optical injection locking of an. A.J.Seeds and J.R.Forrest 829
Impatt oscillators, optical injection locking of. J.R.Forrest and A.J.Seeds 626
Impedance, low-, thin film Josephson junctions, microwave match of. J.H.Hinken 805
Impedance of a circular-disc printed-circuit antenna. S.A.Long, L.C.Shen, M.D.Walton and M.A.Allerding 684
Implantation, oxygen, c.m.o.s. devices fabricated on buried SiO_2 layers formed by, into silicon. K.Izumi, M.Doken and H.Ariyoshi 593
Implantations, hot and cold, comparison of electrical profiles from, of zinc ions into GaAs. S.S.Kular, B.J.Sealy and K.G.Stephens 22
Implanted GaAs, zinc, electrical profiles from. S.S.Kular, B.J.Sealy and K.G.Stephens 2
Implanted Si m.o.s.f.e.t.s. for high-speed applications. U.Niggebrugge, C.Tsironis, W.Filensky, P.Balk and H.Beneking 690
Implementation of a 64-point adaptive filter using an analogue c.c.d. programmable filter. C.F.N.Cowan, J.Mavor and J.W.Arthur 568
Implementation of ternary identity cells using c.m.o.s. integrated circuits. H.T.Koanantakool 462
Implementation of Winograd's algorithm in modular arithmetic for digital convolutions. N.Sridhar.Reddy and V.Umapathi.Reddy 228
Improved adaptive observer with optimal convergence. C.K.Li 778
Improved chemical vapour deposition method for long-length optical fibre. M.Okada, M.Kawachi and A.Kawana 89
Improving the efficiency of Sammon's nonlinear mapping by using clustering archetypes. C.E.Pykett 799
Improving the large-signal models of bipolar transistors by dividing the intrinsic base into two lateral sections. H.-M.Rein Errata 350
Increasing the effective barrier height of Schottky contacts to n-$In_xGa_{1-x}As$. D.V.Morgan and J.Frey 737
Increasing the efficiency of roulette simulation of teletraffic. M.H.Ackroyd 270
Index profile data, assessing, method of. J.P.Hazan, J.P.Cabanie and J.J.Bernard 416
Inductance simulation and filter design using a single-pole amplifier approximation. J.Allen, M.Gumussoy and A.G.J.Holt 629

Inductance, single-resistance-controlled lossless floating, realisation of. R.Senani 828
Inductors, active simulation of, using current conveyor. R.Senani 483
Influence of low-temperature thermotreatment on the characteristics of Cr-GaAs and Au;Cr-GaAs Schottky diodes. O.Yu Borkovskaya, N.L.Druitruk, R.V.Kovalova and Filativ. M.Yu. 700
Influence of noncircular core on the polarisation performance of single mode fibres. V.Ramaswamy and W.G.French 143
InGaAsP/InP h.d. l.e.d.s. for fibre-optical communications. I.Umebu, O.Hasegawa and K.Akita 499
Initial observations of optical injection locking of an X-band impatt oscillator. A.J.Seeds and J.R.Forrest 829
InP m.i.s.f.e.t., n-channel inversion-mode. D.L.Lile, D.A.Collins, L.G.Meiners and L.Messick 657
InP-SiO_2 m.i.s. structure with reduced interface state density near conduction band. D.Fritzsche 51
Insular-image guide-fed short backfire antenna. R.N.Simons and D.T.Shahani 644
Integral equation, a new space-time, for two-dimensional transient scattering. B.Jecko and A.Papiernik 512
Integrated circuits, c.m.o.s., implementation of ternary identity cells using. H.T.Koanantakool 462
Integrated circuits, selectively ion implanted Gunn-f.e.t., for pulse regenerator. T.Mizutani, S.Ishida, K.Kurumada and M.Ohmori 294
Integration-free algorithms for fixed end-point regulator problems. N.Viswanadham and J.Warrior 376
Integrator, a low-cost lomg-term stochastic. I.H.Witten and P.H.C.Madams 293
Integrator, an improved switched-capacitor. G.C.Temes and I.A.Young 287
Integrator, two-, loop filters, phase correction in, using a single compensating resistor. A.M.Soliman and M.Ismail 375
Integrators, nonrecursive, some considerations of signal/noise improvement using recuisive and. J.D.E.Beynon and C.P.Traynar 554
Intensity fluctuations of injection lasers operated with high frequency modulation. W.R.Lange 7
Intensity profile distortion due to resolution limitation in fibre index profile determination by near field. J.P.Hazan 158
Interaction of high-frequency sound with fibre-guided coherent light. D.Howard and T.J.Hall 620
Interface state density, reduced, InP-SiO_2 m.i.s. structure, with near conduction band. D.Fritzsche 51
Interference and co-ordination, relative importance of tropospheric and precipitation scatter in. J.A.Lane 425
Interference, bias and residual intersymbol, of minimum-variance equalisers for digital communication. G.Nicholson and J.P.Norton 678
Interference, envelope probability density function of the sum of signal, noise and. I.M.Kostic 490
Interference suppression, rapid converging adaptive orthogonal projection for. W.Buhring 515
Interframe slope overload for television picture noise reduction. T.J.Dennis 547
Intermodulation distortion, analysis of, in GaAs m.e.s.f.e.t. amplifiers. R.A.Minasian 590
Intermodulation distortion improvement by active compensation in an X-band impatt amplifier. C.S.Aitchison and A.S.Bains 474
Intermodulation distortion, third-order, in microwave amplifier. K.K.Agarwal and Y.L.Kuo 282
Intermodulation improvement by appropriate channel allocations. E.Rotholz 584
Intersymbol interference of, bias and residual, of minimum-varaince equalisers for digital communication. G.Nicholson and J.P.Norton 678
Introducing disjoint spectral translation in spectra multiple-valued logic design. C.Moraga 241
Investigation into the survival of epitaxial bipolar transistors in current mode second breakdown. M.Dow and K.I.Nuttall 100
Investigation of optical fibre buckling in loose-tube packaging. M.H.Reeve 47
Investigation of scattering by corrugated structures using impedance boundary conditions. L.Shafai, K.Iskander and J.E.Hansen 144
Ion implantation, amorphous-layer formation in GaAs by. Min-Shyong Lin 695
Ion implantation, GaAs Varactor diodes for u.h.f. tv tuners fabricated by. I.Niikura, N.Toyoda, Y.Shimura, S.Yokoyama, M.Mihara, T.Hayashi and T.Hara 9
Ion implantation of neon in silicon for planar amorphous isolation. J.A.Yasaitis 460
Ion-implantation technique, GaAs Hall-effect devices fabricated by. T.Inada, T.Ohkubo, S.Kato, M.Kitahara, Y.Kanda and T.Hara 503
Ion implanted GaAs varactor diodes: capacitance uniformity. N.Toyoda, I.Niikura, Y.Shimura, T.Hozuki, H.Sugibuchi, M.Mihara and T.Hara 152
Ion-implanted p-n junction indium-phosphide impatt diodes. J.J.Berenz, F.B.Fank and T.L.IHierl 683
Ion-irradiated, switching conduction in, layers in GaAs. A.J.N.Houghton 102
Iterative method, a simple, for overcoming errors due to heating of current-measuring shunts. C.R.Melbourne and M.R.Barrault 800

J

Joint loss in single-mode fibres. W.A.Gambling, H.Matsumura and C.M.Ragdale 491
Jointing loss in a single-mode fibres. W.A.Gambling, H.Matsumura and A.G.Cowley 54
Josephson junctions, low-impedance thin film, microwave match of. J.H.Hinken 805
Junction superconducting memory cell, single Josephson. J.A.Blackburn and H.J.T.Smith 597

K

Kalman, relationship between, and notch filters used in dynamic ship positioning systems. M.J.Grimble 399

L

L.E.D.S., InGaAsP/InP D.H., for fibre-optical communications. I.Umebu, O.Hasegawa and K.Akita 499
L.P.E., current controlled GaAs, use of, for optimum doping profiles in L.S.A. diodes. D.J.Lawrence and L.F.Eastman 77
Ladder filters, multirate multiplierless discrete. L.T.Bruton and R.H.Khan 814
Ladder synthesis, multiple canonic RLC, of biquadratic immittance functions with double poles and complex zeros. S.Tirtoprodjo and P.Van Beers 607
Lamb-wave device with three operation modes. K.Toda and Y.Yamashita 747
Large signal GaAs m.e.s.f.e.t. model and distortion analysis. R.A.Minasian 183
Laser-annealed, electrical properties of, donor-implanted GaAs. B.J.Sealy, S.S.Kular, K.G.Stephens, R.Croft and A.Palmer 720
Laser, d.h., configuration. a new, with passive transverse field confinement. T.E.Rozzi, J.H.C.Van Heuven and G.H.In'T Veld 87
Laser diodes, GaAs, realistic efficiency of coupling light from, into parabolic-index optical fibres. G.K.Khoe and G.Kuyt 666
Laser diodes, long-term lifetests of C.W. (AlGa)As, at room temperature. M.Ettenberg, H.Kressel and I.Ladany 815
Laser, GaInAsP diode, C.W. modelocking of a. L.A.Glasser 725
Laser level control circuit for high-bit-rate systems using a slope detector. D.W.Smith 775
Laser mode, AlGaAs, fractional spontaneous emission coupled into. J.Ito and S.Machida 693
Laser, waist/notch (S.W.A.N.) injection, planar stripe with. T.Ikegami, G.Iwane, H.Kawaguchi and K.Wakita 753
Lasers, 1.27 μm wavelength c.w. InGaAs/InP d.h., 1.1 Gb/s pseudorandom pulse code modulation of. S.M.Abbot, W.M.Muska, T.P.Lee, A.G.Dentai and C.A.Burrus 349
Lasers, d.h., multimode field theory explanation of kinks in the characteristics of. J.Buus 127
Lasers, d.h., thermal gradient enhanced current spreading in. R.T.Jr.Lynch, L.Yang and R.Y.Hung 769
Lasers, InGaAsP/InP d.h., threshold dependence on active-layer thickness in. R.E.Nahory and M.A.Pollock 727
Lasers, InGaAsP/InP double heterostructure, direct modulation of. S.Akiba, K.Sakai and T.Yamamoto 197
Lasers, InP-GaInPAs d.h., zinc contamination and misplaced p-n junctions in. J.J.Coleman and F.R.Nash 558
Lasers, InP/$In_{1-x}Ga_xAs_yP_{1-y}$, dielectric-constant step of. G.D.Henshall, P.D.Greene, G.H.B.Thompson and P.R.Selway 796
Lasers, linear 13 μm wide stripe c.w. GaAs/GaAlAs d.h., to more than 10 mW. C.J.Lindstrom and M.Janson 172
Lasers, low-threshold proton-isolated (GaAl)As, spectral and transient response of. M.R.Matthews and A.G.Steventon 649
Lasers, low-threshold proton-isolated (GaAl)As, spectral and transient response of. M.R.Matthews and A.G.Steventon 649
Lasers operated, injection, intensity fluctuations of, with high frequency modulation. W.R.Lange 7
Lateral phototransistor with low intensity light sensitivity. Y.Hayashi and K.Yoshihara 295
Leaky modes and rays on multimode step-index waveguides - a comparison. J.D.Love, C.Winkler, R.Sammut and K.Barrell 489
Least-mean-square (minimum integrated power loss ratio) lowpass filters with a pair of imaginary-axis zeros. P.Thajchayapong 268
Least-squares algorithm for the design of digital 2-dimensional allpass filters. G.L.Sicuranza 645
Legendre tapers. P.A.Massaro and V.Picciarelli 823
Lens connector, practical low-loss, for optical fibres. A.Nicia 511
Lenses for wideband corrugated conical horns. R.Padman 311
Lensless acousto-optical convolver. A.Alippi, A.Palma, L.Plamieri, G.Socino and E.Verono 525
Light-emitting diodes (l.e.d.s) as receivers with avalanche gain. W.M.Hubbard and H.E.Kehlenbeck 553
Light-emitting diodes, short wavelength (AlGa)As, degradation in. I.Ladany and H.Kressel 407
Lightning, daytime, photoelectric detector for. E.M.Thomson 337
Lightography, submicrosecond X-ray. D.J.Nagel, M.C.Peckerar, R.R.Whitlock, J.R.Greig and R.E.Pechacek 781
Limitations of zinc sulphide leaky waveguide electro-optic modulators. P.L.Jones and D.R.Cotton 10
Line behaviour, hybrid mode slot, approximations to. C.M.Krowne Errata 317
Line width control in electron-beam lithography. J.C.H.Phang and H.Ahmed 382
Linear detection of charge in c.c.d. with a dual gate. G.S.Hobson, R.Longstone and R.C.Tozer 400
Linear regulators, computation of optimal piecewise-linear feedback gains for. P.J.Fleming 651
Linear system reduction, matrix Cauer form for. R.Parthasarathy and S.John 468
Linear systems, discrete, simple method of designing suboptimal dynamic controllers for. C.S.Berger 4
Linear systems, eigenvalue sensitivity method for optimal stabilisation of. V.Guruprasada Rau 59
Linear systems, multivariable discrete-time, algorithm for identification of. M.Brucoli, B.Maione and F.Torelli 313
Linear systems, multivariable discrete-time, algorithm for identification of. R.C.Goodfellow, A.C.Carter, R.Davis and C.Hill 328
Linearisation of a cascaded system of analogue optical links. J.Straus and D.Frank 436
Links, terrestrial, microwave, attenuation/rain-rate relationships on, in the frequency range 10-40 GHz. B.N.Harden, butterworth and W.J.K.White 154
Liquid crystal displays, multiplexed, a novel method of temperature compensation for. C.Hilsum, R.J.Holden and E.P.Raynes 430
Liquid crystal phase-change cells, the effect of surface preparation on voltage threshold in. J.C.Varney and L.E.Davis 25
Logic-array structure, programmable-, parallel controller utilising a. D.Riches 518
Logic circuits, Josephson tunnelling, 'Bootstrapping' in. H.Yamada and A.Ishida 300
Logic elements, adaptive digital, design of stochastic learning automata using. R.G.Neville, C.R.Nicol and P.Mars 324
Logic functions using interacting two-state m.o.s. devices. M.M.Darwish and K.Board 482
Logic systems with concurrency, an asynchronous logic array for the realisation of. M.Courvoisier 119
Logic, V-groove substrate fed. Y.-L.Ho, F.E.Holmes and C.A.T.Salama 240
Long-term lifetests of C.W. (AlGa)As laser diodes at room temperature. M.Ettenberg, H.Kressel and I.Ladany 815
Loss and sensitivity of the Lange coupler. R.Horton 391
Loss, joint, in single-mode fibres. W.A.Gambling, H.Matsumura and C.M.Ragdale 491
Loss, optical-fibre, for high-speed drawing. K.Imoto and M.Sumi 749
Loss, optical, hydraulic pressure dependence of, in jacketed optical fibre. Y.Katsuyama, S.Mochizuki, T.Yashiro and Y.Ishida 372
Losses, random bend, in single-mode optical-fibre cables: power spectrum estimation from spectral losses. K.Furuya and Y.Suematsu 653
Losses, splice, normalised frequency dependence of, in single-mode optical fibres. Y.Murakami, I.Hatakeyama and H.Tsuchiya 277
Loudness ratings, calculation of reference equivalents and. D.L.Richards 647
Low-distortion downconvertor using varactor diodes. G.Ohm 303
Low-frequency noise in ideal GaAs Schottky-barrier diodes. M.J.Sisson, A.M.Hansom, A.J.Grant, A.M.White and B.Day 662
Low leakage nearly ideal Schottky barriers to n-InP. O.Wada and A.Majerfeld 125
Low loss and low OH content soda-lime-silica glass fibre. S.Takahashi, S.Shibata and M.Yasu 151

Low loss fibre transmission of high speed pulse signals at 1.29 μm wavelength. M.Saruwatari, K.Asatani, Jun-Ichi.Yamada, I.Hatakeyama, K.Sugiyama and T.Kimura 187
Low-loss Y-coupler for multimode single fibres. L.Fiorina, S.Mezzeti and F.Svelto 808
Low noise chargesensitive preamplifier for fast pulse counting. G.Grainger and D.K.Bedford 126
Low-OH-content optical fibre fabricated by vapour-phase axial-deposition method. S.Sudo, M.Kawachi, T.Edahiro, T.Izawa, T.Shioda and H.Gotoh 534
Low temperature electroplated Au-SnNi-Au Ohmic contacts on n type GaAs. W.M.Kelly and G.T.Wrixon Errata 232
Lowpass and highpass all-pole f.d.n.r. neyworks, design considerations for. R.E.Massara 225
Lowpass Butterworth characteristic, third-order, using current conveyors, equal valued earthed-capacitor realisation of a. R.Nandi 699
Lowpass filters, least-mean-square (minimum integrated power loss ratio), with a pair of imaginary-axis zeros. P.Thajchayapong 268
Lowpass filters, nonmonotonic, general analysis of, having multiple pairs of imaginary-axis zeros with weighted least-mean-square error characteristic. D.T.Phuc and J.Attikiouzel 600
Lowpass filters, nonmonotonic, generalised analysis of, with minimum power loss characteristic. D.T.Phuc and J.Attikiouzel 359
Lowpass filters, on, having multiple pairs of imaginary-axis zeros at two distinct points in the stopband with l.m.s. error characteristic. D.T.Phuc and J.Attikiouzel 706

M

M.E.S.F.E.T. amplifier, a 4-8 GHz dual gate. J.Goel and H.J.Wolkstein 167
M.E.S.F.E.T. model, large signal GaAs, and distortion analysis. R.A.Minasian 183
M.E.S.F.E.T., new estimate of the minimum noise figure of a. C.R.Brewitt-Taylor, P.N.Robson and J.E.Sitch 818
M.E.S.F.E.T.S., GaAs, effect of neutron and gamma irradiaiton on the low-frequency noise in. S.B.Moghe, R.J.Gutmann, M.J.Chudzicki and J.M.Borrego 637
M.E.S.F.E.T.s, InP, remediable and non remediable causes of parastic elements in. T.Wada and J.Frey 830
M.I.S.F.E.T., n-channel inversion mode InP. D.L.Lile, D.A.Collins, L.G.Meiners and L.Messick 657
M.I.S. structure, InP-SiO_2, with reduced interface state density near construction band. D.Fritzsche 51
M.O.S. structures, GaAs, white-light emission from. B.Bayraktaroglu and H.L.Hartnagel 470
Magnetic recording, high-density digital, using the (5,6) alternating disparity block code. M.Davidson and J.L.Machamer 459
Magnetic suspension, eddy-current. J.W.Finch and H.Joyce 442
Magnetoplasma half space, cyclotron and upper hybrid resonance frequency in reflected pulse by. B.V.Stanic 397
Magnetoplasma, radiation from a radial waveguide in a. L.Kumar and J.S.Verma 57
Magnetoresistive class-C frequency multipliers. V.Dey and D.Midgley 623
Mapping, improving the efficiency of Sammon's nonlinear, by using clustering archetypes. C.E.Pykett 799
Match, microwave, of low-impedance thin film Josephson junctions. J.H.Hinken 805
Material dispersion in lightguide glasses. J.W.Fleming 326
Matrix Cauer form for linear system reduction. R.Parthasarathy and S.John 468
Maximum electric field in high-field domain. M.Shur 521
Maximum-likelihood reception on nonlinear dispersive data channels. R.Wood 669
Meander channel c.c.d. (m.c.c.d.) transversal. Y.Miyamoto, K.Tanikawa and H.Sei 538
Measured performance of a sum-cosine data-window circuit. M.Trivedi and K.V.Lever 564
Measurement of single-mode fibre core-cladding concentricity. A.R.Tynes, R.M.Derosier and W.G.French 113
Measurement of the extinction crosssection of dielectric spheres using an open resonator. D.L.Bryant and L.J.Auchterlonie 475
Measurements, computer-corrected network-analyser, repeatability of, of reflection coefficients. E.F.Da Silva and M.K.McPhun 832
Mechanical strength of fusion-spliced optical fibres. I.Hatakeyama, M.Tachikura and H.Tsuchiya 613
Medical, non-invasive, results of low-loss wideband ultrasonic transducers for. J.Souquet and Ph.Defranould 235
Medium power 12-18 GHz amplifier module. K.B.Niclas 29
Membrane wave delay line, a. M.Luukala and P.Merilainen 123
Memory cell, single Josephson junction superconducting. J.A.Blackburn and H.J.T.Smith 597
Memory structure, electrically erasable f.a.m.o.s., using avalanche injection from floating gate. H.C.Card 674
Memory transistor, GaAs m.a.o.s.f.e.t.. B.Bayraktaroglu, A.Colquhoun and H.L.Hartnagel 19
Method for the direct measurement of y-, z-, h- and g-parameters at microwave frequencies. K.L.Kotzebue 455
Method of assessing index Profile data. J.P.Hazan, J.P.Cabanie and J.J.Bernard 416
Microbending, use of principal mode numbers in the theory of. J.Arnaud 663
Microcomputer error correction, adaptive instantaneous pitch, detector with. N.R.Malik and S.C.Huang 109
Microscope, reflective acoustic, signal processing in the. J.Attal and G.Cambon 472
Microscopy, acoustic, characteristic material signatures by. R.D.Weglein and R.G.Wilson 352
Microscopy, reflection acoustic, contrast in. H.K.Wickramasinghe 305
Microscopy, scanning acoustic, Gray scale for. R.D.Weglein 656
Microstrip couplers with improved directivity. H.-J.Herzog 50
Microstrip, crossovers in. R.Horton 110
Microstrip gap structures, laser-excited, current density distribution and equivalent photoconductance of. W.Platte and K.Moesel 591
Microstrip lines, coupling between two, through apertures. M.Kumar 415
Microstrip, radiation conductance of open-circuit low dielectric constant. C.Wood, P.S.Hall and J.R.James 121
Microstrip structures, closed formula for the static three-dimensional Green function in. J.R.Mosig 544
Microwave amplifier, third-order intermodulation distortion in. K.K.Agarwal and Y.L.Kuo 282
Microwave applicator for tubular dielectric materials. A.Kumar Errata 530
Microwave field-effect transistors, profile design for distortion reduction in. R.A.Pucel 204
Microwave frequencies, method for direct measurement of y-, z-, h- and g-parameters at. K.L.Kotzebue 455
Microwave integrated circuits, modified suspended striplines for. J.P.Villotte, M.Aubourg and Y.Garault 602
Microwave $In_{1-x}Ga_xAs_yP_{1-y}$/InP f.e.t.. H.Morkoc, J.T.Andrews, Y.M.Houng, R.Sankaran, S.G.Bandy and G.A.Antypas 448
Microwave links, satellite, one-parameter adaptive cancellation for. N.J.McEwan and M.S.Mahmoud 624
Microwave links, terrestrial, attenuation/rain-rate relation ships on, in the frequency range 10-40 GHz. B.N.Harden, buty →bury and W.J.K.White 154
Microwave, m.e.s.f.e.t., some effects of wave propagation in the gate of a. P.H.Ladbrooke 21
Microwave m.o.s.f.e.t., enhancement-mode GaAs, new structure of. T.Mimura, K.Odani, N.Yokoyama and M.Fukuta 500
Microwave match of low-impedance thin film Josephson junctions. J.H.Hinken 805
Microwave planar networks: The annular structure. G.D'Inzeo, F.Giannini, R.Sorrentino and J.Vrba 526
Microwave signals, transmission of, through an e.h.v. insulator for application to e.h.v. electronic current-sensing systems. D.V.Otto 692
Millimetre-wave switching by optically generated plasma in silicon. C.H.Lee, S.Mak and A.P.DeFonzo 733
Minimal order observers for linear functions of the state vector. S.Srinathkumar 275
Mirror, dichroic secondary, geometry of waveguides in a. R.J.Langley and E.A.Parker 443
Mixer, f.e.t., modelling of an. P.Harrop and T.A.C.M.Claasen 369
Mixer, X-band balanced, using evanescent-mode circuitry. G.Begemann and C.Peters 748
Mobile radio propagation at 436 MHz, surburban, time-delay/Doppler scattering function for. A.S.Bajwa and J.D.Parsons 423
Mobility profilling of f.e.t. structures. P.R.Jay, I.Crossley and M.J.Cardwell 190
Mode circuitry, evanescent-, X-band balanced mixer using. G.Begemann and C.Peters 748
Model formulation, aggregate, new approach to, through state feedback. C.H.Orr and D.J.Ilolding 679
Modelling, explicit of antennas with sparse-ground screens. E.K.Miller, J.N.Brittingham and J.T.Okada 627
Modelling of an f.e.t. mixer. P.Harrop and T.A.C.M.Claasen 369
Models, large-signal, improving the, of bipolar transistors by dividing the intrinsic base into two lateral sections. H.-M.Rein Errata 350
Models of nonlinear dynamic systems, parameter estimation in uncertain. D.J.Leal, G.Georgantzis and P.D.Roberts 718
Modes, excited longitudinal, analysis of the effect of spontaneous emission coupling on the number of, in semiconductor lasers. D.Renner and J.E.Carroll 779
Modification of zinc diffusion profiles in GaAs by proton irradiation. A.J.Houghton, B.Tuck and K.G.Stephens 185
Modified Newton's algorithm for the Riccati equation. K.V.M.Fernando and H.Nicholson 576
Modified suspended striplines for microwave integrated circuits. J.P.Villotte, M.Aubourg and Y.Garault 602
Modulated laser signal, optimum decoding of M-ary polarisation. N.Malaviya 104
Modulation, direct, of InGaAsP/InP double heterostructure lasers. S.Akiba, K.Sakai and T.Yamamoto 197
Modulation, high frequency, intensity fluctuations of injection lasers operated with. W.R.Lange 7
Modulation of room temperature GaAs lasers at X-band frequencies. M.R.Lakshminaravana, R.G.Hunsperger and L.D.Partain 640
Modulators, multimode optical-fibre phase, and discriminators: I-Theory. S.A.Kingsley and D.E.N.Davies 322
Monolithic analogue filters, design method for. R.Schaumann and J.R.Brand 710
Monolithic bipolar-j.f.e.t. c.c.o., wide-range. F.V.J.Sleeckx and W.M.C.Sansen 259
Monolithic high-speed d.a. convertor, 10-bit. A.Barna, J.W.Grace and N.L.Rhodes 542
Monotonic lowpass filters with maximum selectivity, comment on. D.T.Phuc 362
Multicomponent glass fibres with high numerical aperture. S.Takahashi, S.Mitachi, S.Shibata and M.Yasu 280
Multifunction active R filter with two operational amplifiers. S.Venkateswaran 741
Multilevel signals in digital optical-fibre communications. R.Petrovic 806
Multimode 2 × 2 optical crossbar switch. R.A.Soref and D.H.McMahon 283
Multimode optical fibre phase modulators and discriminators: II-experiments. S.A.Kingsley 335
Multimode rate equation description of homogeneous spectral broadening in semiconductor lasers. M.Danielsen and F.Mengel 505
Multimode theory field explanation of kinks in the characteristics of d.h. lasers. J.Buus 127
Multiple-beam dual-offset reflector antenna with an array feed. T.S.Bird, J.L.Boomars and P.J.B.Clarricoats 439
Multiple canonic RLC ladder synthesis of biquadratic immittance functions with double poles and complex zeros. S.Tirtoprodjo and P.Van Beers 607
Multiple-valued logic design, spectral, introducing disjoint spectral translation in. C.Moraga 241
Multiplexer, diode in the multi-Gbit/s range. U.Barabas, U.Langmann and B.G.Bosch 62
Multiplexer, high-speed analogue, using s.a.w. technology. T.M.Reeder, G.K.Montress and T.W.Grudkowski 756
Multiplexer, optical wavelength-division for the 1-1.4 μm spectral region. W.J.Tomlinson and Chinlon Lin 345
Multiplexing, distributed. D.N.Riches 516
Multiplier for delta-modulated signals. D.Lagoyannis 615
Multiplyimg input technique, a novel c.c.d.. D.V.McCaughan, J.C.White and J.R.Hill 165
Multirate muliplierless discrete ladder filters. L.T.Bruton and R.H.Khan 814
Multivariable systems, computing the invariant zeros of. Y.Shamash 208
Multivariable systems, linear, design of high-gain state-feedback controllers for. B.Porter 256
Multomode optical-fibre phase modulators and discriminators: I-Theory. S.A.Kingsley and D.E.N.Davies 322

N

n-channel inversion mode InP m.i.s.f.e.t.. D.L.Lile, D.A.Collins, L.G.Meiners and L.Messick 657
N-InP, Schottky barriers to, low leakage nearly ideal. O.Wada and A.Majerfeld 125
Narrowband Gaussian noise: variance of the number of zero crossings. N.M.Blachman 75
Neon, ion implantation of, in silicon for planar amorphous isolation. J.A.Yasaitis 460
Network-analyser measurements, computer-corrected, repeatability of, o of reflection coefficients. E.F.Da Silva and M.K.McPhun 832
Network model for strip-fed cavity-backed printed slot antenna. D.T.Shahani and B.Bhat 767
Networks, RC bidimensional, time-domain synthesis of, via the approximate solution of Volterra's equations. R.Lojacono 182

Neutron, effect of, and gamma irradiation on the low-frequency noise in GaAs m.e.s.f.e.t.s.. S.B.Moghe, R.J.Gutmann, M.J.Chudzicki and J.M.Borrego 637

New acoustic-surface-wave zero-temperature cuts in $T1_2VS$. J.Henaff Errata 318

New approach to aggregate model formulation through state feedback. C.H.Orr and D.J.Ilolding 679

New approach to stochastic data analysis: The Nile river at Aswan. O.Obidapo-Obe 765

New contact resistance profiling method for the assessment of III-V multilayer structures. R.C.Goodfellow, A.C.Carter, R.Davis and C.Hill 328

New estimate of the minimum noise figure of a M.E.S.F.E.T.. C.R.Brewitt-Taylor, P.N.Robson and J.E.Sitch 818

New ideal active inductance and frequency dependent negative resistance using d.v.c.c.s./d.v.c.v.s.: applications in sinudoidal-oscillator realisation. R.Nandi 551

New structure of enhancement-mode GaAs microwave m.o.s.f.e.t.. T.Mimura, K.Odani, N.Yokoyama and M.Fukuta 500

New transmission code for digital optical communications. R.Petrovic 541

Newton's algorithm, modified, for the Riccati equation. K.V.M.Fernando and H.Nicholson 576

Nodal analysis of d.c. bias circuits. J.J.Witkowski 137

Noise, 1/f, and resistance between circular electrodes. L.K.J.Vandamme and J.C.F.Groot 30

Noise and interference, sum of signal, envelope probability density function of the. I.M.Kostic 490

Noise characterisation, absolute, of avalanche photodiodes. M.C.Brain 485

Noise, continuous and impulsive, with i.s.i., binary baseband polar signals in combination with. V.K.Jain and S.N.Gupta 82

Noise, low-frequency, effect of neturon and gamma irradiation on the, in GaAs m.e.s.f.e.t.s.. S.B.Moghe, R.J.Gutmann, M.J.Chudzicki and J.M.Borrego 637

Noise, low-frequency, in ideal GaAs Schottky-barrier diodes. M.J.Sisson, A.M.Hansom, A.J.Grant, A.M.White and B.Day 662

Noise, multiplication, temperature dependence of, in silicon avalanche photodiodes. H.Kanbe 539

Noise, narrowband Gaussian: variance of the number of zero crossings. N.M.Blachman 75

Noise reduction, telecision picture, interframe slope overload for. T.J.Dennis 547

Noise silicon planar avalanche photodiodes, very low. J.J.Goedbloed and E.T.J.M.Smeets 67

Noisy transients, optimum correlation method for measurement of, in solid-state physics experiments. M.S.Hodgart 388

Non linear dynamic systems, parameter estimation in uncertain models of. D.J.Leal, G.Georgantzis and P.D.Roberts 718

Non-repeatered 50 km transmission experiment using low-loss optical fibres. T.Ito, K.Nakagawa, K.Aida, K.Takemoto and K.Suto 520

Nondestructive determination of refractive-index profile of an optical fibre: forward light scattering method. C.Saekeang and P.L.Chu 802

Nonlinear asymmetrical second-order oscillators, periodic response of. L.Vidaller 302

Nonlinear dynamical systems, discrete, error bounds on stochastic approximates in. O.Ibidapo-Obe 230

Nonlinear dynamical systems, discrete, the use of stochastic approximation for state estimation in, comment on. D.Sprevak and M.M.Newmann 730

Nonlinear theory of long-range-interaction resonant generators. A.A.Shmat'ko, O.A.Tretikov and D.M.Vavriv Errata 46

Nonlinearities, multivalued, determination of the sinusoidal-input describing functions for sampled-data systems having. C.P.Lewis 556

Normalised frequency dependence of splice losses in single-mode optical fibres. Y.Murakami, I.Hatakeyama and H.Tsuchiya 277

Note on the stability of first-order p.w.m. systems. R.Unnikrishnan 774

Novel f.e.t. power oscillator. P.C.Wade 672

Novel m.o.s. differential amplifier for sampled-data applications. P.B.Denyer and J.Mavor 1

Number of minimum-weight code words in a product code. R.L.Miller 642

Number-theoretic-transform-implemented finite-impulse-response filter, computational efficiency of. T.A.Kriz and D.A.Bachman 731

Number-theoretic transforms, computing complex, fast algorithms for. I.S.Reed and T.K.Truong 231

Nylon buftering effects in multimode optical fibres. K.Tatekura, K.Itoh and T.Matsumoto 441

O

Ohmic contacts, low temperature electroplated Au-SnNi-Au, on n type GaAs. W.M.Kelly and G.T.Wrixon Errata 232

On 2-variable reactance functions for 2-dimensional recursive filter design. A.M.Ali and A.G.Constantinides 12

On a sequential regression predictor. D.Soldan and H.Ahmed 118

On exact compensation of transfer inefficiency in a charge transfer delay line. S.C.Dutta Roy and V.G.Das 115

On lowpass filters having multiple pairs of imaginary-axis zeros at two distinct points in the stopband with l.m.s. error characteristic. D.T.Phuc and J.Attikiouzel 706

On multiplicative overflow detection in residue number system. R.C.Debnath and D.A.Pucknell Errata 385

On pole assignment by proportional-plus-derivative output feedback. P.N.Paraskevopoulos 34

On pole placement using output feedback. M.Seraji 739

On symmetrical corrugated reflectors with zero depolarisation. G.L.James and B.MacA.Thomas 210

On the derivation and interpretation of the Marcatili profile conditions for optical fibres. C.Pask 13

On the optimum ratio of distance between wires to conductor radius of symmetrical star quad cable for digital signal transmission. N.Kojima, M.Ohmura and T.Fuchigami 223

On the sensitivity analysis of linear active networks. E.A.Laksberg 221

On the use of stochastic approximation in the state-parameter identification problem. D.Sprevak and M.M.Newmann 351

One-parameter adaptive cancellation for satellite microwave links. N.J.McEwan and M.S.Mahmoud 624

Open resonators for the measurement of permittivity. A.C.Lynch 596

Operational amplifiers and resistance, realisation of grounded capacitor with. M.A.Siddiqi and M.T.Ahmed 633

Optic communication, fibre, semiconductor junction transceiver for. J.J.Geddes, P.E.Petersen, D.Chen and K.P.Koeneman Errata 530

Optic, fibre-, 1 Gbit/s, error-rate measurements on a, communications link. R.Petschacher, J.Gruber and M.Holz 711

Optical circulator, compact, for near-infrared region. A.Shibukawa and M.Kobayashi 816

Optical communication systems, GaAs MESFET technology and characteristics for. J.J.M.Dekkers, W.Filensky and H.Beneking 272

Optical communications, a new signalling format for. L.Bosotti and G.Pirani 71

Optical communications, digital, new transmission code for. R.Petrovic 541

Optical communications, fibre-, InGaAsP/InP d.h. l.e.d.s. for. I.Umebu, O.Hasegawa and K.Akita 499

Optical crossbar switch, multimode 2 × 2. R.A.Soref and D.H.McMahon 283

Optical fibre buckling, investigation of, in loose-tube packaging. M.H.Reeve 47

Optical-fibre cables:, single-mode, random bend losses in, power spectrum estimation from spectral losses. K.Furuya and Y.Suematsu 653

Optical-fibre communications, digital, multilevel signals in. R.Petrovic 806

Optical fibre connector plugs, precise angular misalignment measurement in. Y.Fujii and N.Suzuki 243

Optical-fibre end, hand-held tool for, preparation. J.E.Fulenwider and M.L.Dakss Errata 46

Optical fibre fabricated, low-OH-content, by vapour-phase axial-deposition method. S.Sudo, M.Kawachi, T.Edahiro, T.Izawa, T.Shioda and H.Gotoh 534

Optical fibre, formula giving single-mode limit of, having arbitrary refractive-index profile. K.Hotate and T.Okoshi 246

Optical fibre, graded-index, optimum profile parameter on, at μm wavelength. Y.Ohmori, K.Chida, M.Horiguchi and I.Hatakeyama 764

Optical fibre, jacketed, hydraulic pressure dependence of optical loss in. Y.Katsuyama, S.Mochizuki, T.Yashiro and Y.Ishida 372

Optical fibre, long-length, for, improved chemical vapour deposition method. M.Okada, M.Kawachi and A.Kawana 89

Optical-fibre loss for high-speed drawing. K.Imoto and M.Sumi 749

Optical fibre network, encoding-decoding. E.Marom and O.G.Ramer 48

Optical fibre:, nondestructive determination of refractive-index profile of an, forward light scattering method. C.Saekeang and P.L.Chu 802

Optical-fibre phase modulators, multimode, and discriminators: I-Theory. S.A.Kingsley and D.E.N.Davies 322

Optical fibre phase modulators, multimode, and discriminators: II-experiments. S.A.Kingsley 335

Optical fibre, single, two-way transmission experiments over a, at the same wavelength using micro-optic 3 dB couplers. K.Shinemura, K.Kobayashi, T.Yanase, R.Isaikawa, M.Shikada, A.Ueki and S.Sugimoto 340

Optical fibre, time-dispersion measurement in, by near- and far-field scanning technique. G.Cancellieri 465

Optical fibres-difference method, direct measurement of wavelength dispersion in. K.Daikoku and A.Sugimura 149

Optical fibres, fusion-spliced, mechanical strength of. I.Hatakeyama, M.Tachikura and H.Tsuchiya 613

Optical fibres, graded index, wavelength dependence of modal dispersion in. L.Jeunhomme, J.P.Pocholle and J.Raffy 364

Optical fibres, low-loss, non-repeatered 50 km transmission experiment using. T.Ito, K.Nakagawa, K.Aida, K.Takemoto and K.Suto 520

Optical fibres, low-loss, wideband near-i.r. continuum (0.7-2.1μm) generated in. Chinlon.Lin, V.T.Nguyen and W.G.French 822

Optical fibres, multimode, fabrication of low-loss 3 dB couplers with. Y.Tsujimoto, H.Serizawa, K.Hattori and M.Fukai 157

Optical fibres, multimode, nylon buffering effects in. K.Tatekura, K.Itoh and T.Matsumoto 441

Optical fibres, multimode, optimum operating wavelength for chromatic equalisation in. M.J.Adams, D.N.Payne and F.M.E.Sladen 64

Optical fibres, nineteen, fibre bundle comprising, drawn from the double crucible. H.A.Aulich, J.G.Grabmaier and K.H.Eisenrith 347

Optical fibres, on the derivation and interpretation of the Marcatili profile condition for. C.Pask 13

Optical fibres, parabolic-index, realistic efficiency of coupling light from GaAs laser diodes into. G.K.Khoe and G.Kuyt 666

Optical fibres, parallel-beam excitation method for estimating refractive-index profiles in. A.Ankiewicz, J.M.Adams, D.N.Payne and F.M.E.Sladen 811

Optical fibres, practical low-loss lens connector for. A.Nicia 511

Optical fibres, simple method for measuring material dispersion in. T.Tanifiju and M.Ikeda 367

Optical fibres, single-mode, normalised frequency dependence of splice losses in. Y.Murakami, I.Hatakeyama and H.Tsuchiya 277

Optical fibres: wavelength-dispersive properties of glasses for, the germania enigma. M.J.Adams, D.N.Payne, F.M.E.Sladen and A.H.Hartog 703

Optical image scanning by electronic control of surface acoustic wave attenuation in CdS. Z.Ueda, J.Shirefuji and Y.Inuishi 26

Optical injection locking of impatt oscillators. J.R.Forrest and A.J.Seeds 626

Optical links, analogue, linearisation of a cascaded system of. J.Straus and D.Frank 436

Optical loss, the influence of a fibre structure on, in a graded-index fibre. N.Kashima, N.Uchida, N.Susa and S.Seikai 78

Optical microscope, scanning, examination of grain boundaries in polycrystalline solar cells using a. J.N.Gannaway and T.Wilson 507

Optical waveguide, four-layer, guided modes of a, with a metal buffer. I.Moshkun, T.J.M.Boyd and R.H.C.Newton 587

Optical waveguides fabricated by electric-field controlled ion exchange in glass. G.H.Chartier, P.Jaussaud, A.D.de Oliveira and O.Parriaux 132

Optical waveguides, stripe, diffusion profile of, formed by ion exchange. C.D.W.Wilkinson and R.Walker 599

Optical waveguides with low pulse dispersion over an extended spectral range. R.Olshansky 330

Optical wavelength-division multiplexer for the 1-1.4 μm spectral region. W.J.Tomlinson and Chinlon Lin 345

Optically generated plasma in silicon, millimetre-wave switching by. C.H.Lee, S.Mak and A.P.DeFonzo 733

Optimal convergence, improved adaptive observer with. C.K.Li 778

Optimal piecewise-linear feedback gains, computation of, for linear regulators. P.J.Fleming 651

Optimal regulator, generalised disturbance adaptive. S.Mukhopadhyay 820

Optimal regulator, P.I.D. equivalent of. S.Mukhopadhyay 821

Optimal stabilisation, eigenvalue sensitivity method for, of linear systems. V.Guruprasada Rau 59

Optimisation, integrated system, algorithms, for, and parameter estimation. P.D.Roberts 196

Optimisation of feed position and improved profile mapping of a reflector antenna from microwave holographic measurements. M.P.Godwin, A.P.Anderson and J.C.Bennett Errata 318
Optimised doping profiles for speed-up of GaAs m.e.s.f.e.t.s.. K.Kurumada 481
Optimum aperture distributions in the presence of blockage. M.Sachidananda and S.Ramakrishna 556
Optimum correlation method for measurement of noisy transients in solid-state physics experiments. M.S.Hodgart 388
Optimum decoding of M-ary polarisaion modulated laser signal. N.Malaviya 104
Optimum operating wavelength for chromatic equalisation in multimode optical fibres. M.J.Adams, D.N.Payne and F.M.E.Sladen 64
Optimum profile parameter on graded-index optical fibre at 1.27 μm wavelength. Y.Ohmori, K.Chida, M.Horiguchi and I.Hatakeyama 764
Optimum single-zero lead compensation of systems having two dominant poles. G.J.Sloggett 111
Optoelectronic broadband switching array. R.I.Macdonald and E.M.Hara 502
Oscillations, acoustic, generation of high-frequency electromagnetic and, in a semiconductor in low-frequency electric field. A.S.Bugaev, Y.V.Gulyaev and G.D.Mansfeld 403
Oscillator, novel f.e.t. power. P.C.Wade 672
Oscillator realisation, sinusoidal-, applications in, new ideal active inductance and frequency-dependent negative resistance using d.v.c.c.s./d.v.c.v.s.:. R.Nandi 551
Oscillator, X-band impatt, initial observations of optical injection locking of an. A.J.Seeds and J.R.Forrest 829
Oscillators, impatt, optical injection locking of. J.R.Forrest and A.J.Seeds 626
Oscillators, nonlinear asymmetrical sec second-order, periodic response of. L.Vidaller 302
Overlaid charge-coupled device. R.M.Barsan 176
Oversize single-mode H-guide. T.Yoneyama and S.Nishida 148
Oxygen implanted GaAs, carrier removal profiles from. S.Gecim, B.J.Sealy and K.G.Stephens 306

P

P.C.M., delta-modulation/, convertor. N.Kouvaras 660
P.C.M. frame synchronisation, effect of nonrandom digital signals on. R.J.S.Bates 296
P.C.M., linear, adaptive difference detection and correction system for partial correction of transmission errors in. R.Steele, K.N.Ngan and D.J.Goodman 381
P.I.D. equivalent of optimal regulator. S.Mukhopadhyay 821
p-i-n diode reverse-bias switching via inductive discharging. C.J.Georgopoulos and V.Makios 723
p$^+$-n hyperabrupt GaAs varactors grown by molecular-beam epitaxy. D.W.Covington and W.H.Hicklin 752
P-N junctions, determination of arbitrary doping profile in. D.A.Tjapkin and V.B.Milanovic 639
P-N junctions, misplaced, zinc contamination and, in InP-GaInPAs d.h. lasers. J.J.Coleman and F.R.Nash 558
P.S.K. tracking loops, anti-hangup system for. C.P.Ashall and P.A.Matthews 213
P.W.M. systems, first-order, note on the stability of. R.Unnikrishnan 774
Packaging, loose-tube, investigation of optical fibre buckling in. M.H.Reeve 47
Parallel-beam excitation method for estimating refractive-index profiles in optical fibres. A.Ankiewicz, J.M.Adams, D.N.Payne and F.M.E.Sladen 811
Parallel controller utilising a programmable-logic-array structure. D.Riches 518
Parameter estimation, algorithms for integrated systems optimisation and. P.D.Roberts 196
Parameter estimation in uncertain models of nonlinear dynamic systems. D.J.Leal, G.Georgantzis and P.D.Roberts 718
Parameters, g-, method for the direct measurement of y-, z-, h- and, at microwave frequencies. K.L.Kotzebue 455
Parameters of a spherical random antenna array. T.A.Dzekov and R.S.Berkowitz 495
Partial correction of transmission errors in Walsh transform image without recourse to error correction coding. W.C.Wong and R.Steele 298
Partial fraction expansion of transfer functions with multiple quadratic poles. P.R.Adby 290
Performance comparisons for nonrecursive digital filters with nonlinear phase characteristics. M.A-Razzak and L.G.Cuthbert 370
Performance of a novel dielectric waveguide system for microwave power utilisation by divers. D.Pavlidis and H.L.Hartnagel 262
Performance of a reflector antenna incorporating a filtering Cassegrain mirror. R.J.Langley, P.A.Langsford and E.A.Parker 186
Performance of GaAs m.e.s.f.e.t.s. S.H.Wemple, W.C.Niehaus, W.O.Schlosser, J.V.Dilorenzo and H.M.Cox 175
Periodic response of nonlinear asymmetrical second-order oscillators. L.Vidaller 302
Permittivity, open resonators for the measurement of. A.C.Lynch 596
Phase correction in two-integrator loop filters using a single compensating resistor. A.M.Soliman and M.Ismail 375
Phase-locked loop, a precise digital phase shifter using a. J.Austin and J.R.Forrest 254
Phase-locked loops, second-order, a new technique for imoriving the acquisition performance of. J.P.McGeehan 42
Phase measurements, relative, at 30 GHz between copolar and induced crosspolar signals produced by ice particles on a satellite-to-ground link. P.F.Shutie, E.C.Mackenzie and J.E.Allnutt 105
Phase modulators, multimode optical fibre, and discriminators: II-experiments. S.A.Kingsley 335
Phase shifter, a precise digital, using a phase-locked loop. J.Austin and J.R.Forrest 254
Photoconductance, equivalent, current density distribution and, of laser-excited microstrip gap structures. W.Platte and K.Moesel 591
Photodiode arrays, use of silicon self-scanned linear for the direct display of transmission electron microscope energy loss spectra. D.G.Jenkins, C.J.Rossouw, B.L.Jones, G.R.Booker and P.W.Fry 174
Photoelectric detector for daytime lightning. E.M.Thomson 337
Phototransistor, lateral, with low intensity light sensitivity. Y.Hayashi and K.Yoshihara 295
Physical interpretation of state assignment. C.R.Edwards 428
Picture noise reduction, television, interframe slope overload for. T.J.Dennis 547
Planar indium-diffused lead telluride detector arrays. C.H.Gooch, H.A.Tarry, R.C.Bottomley, M.G.Astles and B.J.Waldock 209
Planar stripe with waist/notch (S.W.A.N.) injection laser. T.Ikegami, G.Iwane, H.Kawaguchi and K.Wakita 753
Plasma, optically generated, millimetre-wave switching by, in silicon. C.H.Lee, S.Mak and A.P.DeFonzo 733
Polarisation performance, influence of noncircular core on the, of single mode fibres. V.Ramaswamy and W.G.French 143
Polarised 11.6, 11.8 and 14.5 GHz OTS signals, circularly, depolarisation of the linearly and. R.G.Howell, J.Thirlwell and R.R.Bell 794
Pole assignment, on, by proportional-plus-derivative output feedback. P.N.Paraskevopoulos 34
Pole, placement, on, using output feedback. M.Seraji 739
Pole:, simulation of inductors and capacitors using operational-amplifier compensation, a caution. B.Gilbert 832
Poles, double, and complex zeros, multiple canonic RLC ladder synthesis of biquadratic immittance functions with. S.Tirtoprodjo and P.Van Beers 607
Poles, multiple quadratic, partial fraction expansion of transfer function with. P.R.Adby 290
Poles, two dominant, optimum single-zero lead compensation of systems having. G.J.Sloggett 111
Positioning systems, dynamic ship, relationship between Kalman and notch filters used in. M.J.Grimble 399
Power attenuation in bent multimode step-index slab and fibre waveguides. J.D.Love and C.Winkler 32
Power attenuation in bent parabolic-index slab and fibre waveguides. C.Winkler, J.D.Love and A.K.Ghatak 570
Power control technique, a simple. S.Tiwari and S.Ashok 393
Power m.e.s.f.e.t.s., GaAs, performance of. S.H.Wemple, W.C.Niehaus, W.O.Schlosser, J.V.Dilorenzo and H.M.Cox 175
Power utilisation, microwave, performance of a novel dielectric waveguide system for, by divers. D.Pavlidis and H.L.Hartnagel 262
Practical low-loss lens connector for optical fibres. A.Nicia 511
Preampli fier, low noise charge sensitive, for fast pulse counting. G.Grainger and D.K.Bedford 126
Precise angular misalignment measurement in optical fibre connector plugs. Y.Fujii and N.Suzuki 243
Prediction of dual-shaped-reflector antenna cross-polarisation. T.S.Bird 98
Primary feeds with wide beamwidths. G.L.James 447
Printed-circuit antenna, circular-disc, impedance of a. S.A.Long, L.C.Shen, M.D.Walton and M.A.Allerding 684
Printed circuit board routability, an improvement in, using a maze-running algorithm. L.S.Pugh 8
Probability density function, envelope, of the sum of signal, noise and interference. I.M.Kostic 490
Probability density functions for Hadamard coefficients in transformed television pictures. M.Ghanbari and D.E.Pearson 252
Profile design for distortion reduction in microwave field-effect transistors. R.A.Pucel 204
Profile, diffusion, of stripe optical waveguides formed by ion exchange. C.D.W.Wilkinson and R.Walker 599
Profiling, carrier, of InP. D.L.Lile and D.A.Collins Errata 530
Profiling method, new contact resistance, for the assessment of III-V alloy multilayer structures. R.C.Goodfellow, A.C.Carter, R.Davis and C.Hill 328
Propagation constant, variation al expression of the, for leaky modes. S.Kawakami and K.Ogusu 73
Propagation delay time of i.i.l. at low current levels. J.Lohstroh and N.C.de Trove 705
Pseudostep orthogonalisation: an algorithm for improving Reed-Massey threshold codes. D.McQuilton and M.E.Woodward 355
Pulse-code modulation, 1.1 Gb/s pseudorandom, of 1.27 μm wavelength c.w. InGaAs/InP d.h. lasers. S.M.Abbot, W.M.Muska, T.P.Lee, A.G.Dentai and C.A.Burrus 349
Pulse delay measurements in the zero-material-dispersion region for germanium- and phosphorus-doped silica fibres. C.Lin, L.G.Cohen, W.G.French and V.A.Foertmeyer 170

Q

Quasi-optical channel diplexer using Fabry-Perot resonator. R.Watanabe and N.Nakajima 81

R

Radar reflect ivity due to hydrometers, variation with height of the statistics of. M.P.M.Hall and J.W.F.Goddard 224
Radar systems, noise, digital correlation for. J.R.Forrest and D.J.Price 581
Radiation, antenna sidelobe, contribution of reflector profile errors to. A.B.Harris Errata 454
Radiation balance microwave thermograph for industrial and medical applications. K.M.Lüdeke, B.Schiek and J.Kohler 194
Radiation conductance of open-circuit low dielectric constant microstrip. C.Wood, P.S.Hall and J.R.James 121
Radiation field analysis and synthesis using Prony's method. E.K.Miller and D.L.Lager 180
Radiation from a radial waveguide in a magneto-plasma. L.Kumar and J.S.Verma 57
Radiation from dielectric sphere loaded horns. A.G.Martin 17
Radiation patterns, feed, modified by a dichroic plate. P.A.Langsford and E.A.Parker 736
Radiation patterns of a reflector antenna incorporating a compensating secondary mirror. R.J.Langley and E.A.Parker 53
Radome-covered reflector antenna, reflection coefficient at the feed of a. H.Cory, K.K.Bhan and P.J.B.Clarricoats 559
Rain, effect of, in the near field of an antenna. D.P.Haworth, N.J.McEwan and P.A.Watson 94
Rain-rate/attenuation, relationships on terrestrial microwave links in the frequency range 10-40 GHz. B.N.Harden, buty→bury and W.J.K.White 154
Random bend losses in single-mode optical-fibre cables: power spectrum estimation from spectral losses. K.Furuya and Y.Suematsu 653
Range estimation from random array phase measurements. S.A.Kassam and Y.Shamash 40
Realisation of a 2-dimensional f.i.r. digital filter using separable filters. P.Karivaratharajan and M.N.S.Swamy 249
Realisation of grounded capacitor with operational amplifiers and resistance. M.A.Siddiqi and M.T.Ahmed 633
Realisation of nth-order lowpass voltage transfer function by active *R* circuit: signal-flow-graph approach. C.Acar 729
Realisation of resistive n-port networks using operational amplifiers. A.Cichocki and S.Osowski 412
Realisation of single-resistance-controlled lossless floating inductance. R.Senani 828
Realisation of three-valued c.m.o.s. cycling gates. J.M.Carmona, J.L.Huertas and J.I.Acha 288
Realistic efficiency of coupling light from GaAs laser diodes into parabolic-index optical fibres. G.K.Khoe and G.Kuyt 666
Redefined element factor for simplified i.d.t. design. S.Datta and B.J.Hungsinger 744
Reducing noise in recursive digital filters by residue retention. P.G.McCrea and I.H.Witten 686
Reflection coefficient at the feed of a radome-covered reflector antenna. H.Cory, K.K.Bhan and P.J.B.Clarricoats 559

Reflection of electromagnetic wave from a time-varying medium. S.Kozaki 826
Reflector antenna, multiple-beam dual-offset, with an array feed. T.S.Bird, J.L.Boomars and P.J.B.Clarricoats 439
Reflector antenna, optimisation of feed position and improved profile mapping of a, from microwave holographic measurements. M.P.Godwin, A.P.Anderson and J.C.Bennett Errata 318
Reflector antenna, performance of a, incorporating a filtering Cassegrain mirror. R.J.Langley, P.A.Langsford and E.A.Parker 186
Reflector antenna, radiation patterns of a, incop=rporating a compensating secondary mirror. R.J.Langley and E.A.Parker 53
Reflector antenna, radome-covered, reflection coefficient at the feed of a. H.Cory, K.K.Bhan and P.J.B.Clarricoats 559
Reflector-,dual-shaped-, prediction of, antenna crosspolarisation. T.S.Bird 98
Reflector feed, equivalent focused, an, in place of any generalised defocused or extended feed. W.V.T.Rusch 5
Reflectors, on symmetrical corrugated, with zero depolarisation. G.L.James and B.MacA.Thomas 210
Refractive index dip, removal of the, by an etching method. S.Hopland 757
Refractive-index profile, nondestructive determination of, of an optical fibre: forward light scattering method. C.Saekeang and P.L.Chu 802
Refractive-index profiles, parallel-beam excitation method for estimating, in optical fibres. A.Ankiewicz, J.M.Adams, D.N.Payne and F.M.E.Sladen 811
Relationship between Kalman and notch filters used in dynamic ship positioning systems. M.J.Grimble 399
Relative importance of tropospheric and precipitation scatter in interference and co-ordination. J.A.Lane 425
Relative phase measurements at 30 GHz between copolar and induced crosspolar signals produced by ice particles on a satellite-to-ground link. P.F.Shutie, E.C.Mackenzie and J.E.Allnutt 105
Remarks on the time moments of composite systems. G.Obinata 509
Remediable and non remediable causes of parastic elements in InP m.e.s.f.e.t.s. T.Wada and J.Frey 830
Removal of the refractive index dip by an etching method. S.Hopland 757
Repeatability of computer-corrected network-analyser measurements of reflection coefficients. E.F.Da Silva and M.K.McPhun 832
Resistance, 1/f noise and, between circular electrodes. L.K.J.Vandamme and J.C.F.Groot 30
Resonances in a circular waveguide cavity end-loaded with magnetised ferrite discs. J.M.Hellums and L.E.Davis 479
Resonant frequencies of a cavity with a cylindrical hole in a wall of infinite thickness. E.A.Shapoval 445
Resonant generators, long-range-interaction, nonlinear theory of. A.A.Shmat'ko, O.A.Tretikov and D.M.Vavriv Errata 46
Resonator, open, determination of scattering widths of a long thin wire using an. C.M.Tang and A.L.Cullen 245
Resonator, open, measurement of the extinction cross-section of dielectric spheres using an. D.L.Bryant and L.J.Auchterlonie 475
Resonators, open, for the measurement of permittivity. A.C.Lynch 596
Results on low-loss wideband ultrasonic transducers for non-invasive medical application. J.Souquet and Ph.Defranould 235

S

S.A.W. bandpass filter with - −50 dB sidelobes using unweighted i.d.t.s.. P.Sudhakar, A.B.Bhattacharyya and B.Mathur 437
S.A.W.-based discrete Fourier transformer, fast. J.B.G.Roberts, B.J.Darby, R.A.Bale and R.Eames 783
S.A.W. chirp filters, fast-Fourier-transform processor using. M.A.Jack 634
S.A.W. delay lines, true quadrature taps for. R.J.Murray, R.C.Peach and S.Neylon 631
S.A.W. monolithic storage correlator, adaptive filter based on. P.M.Grant and G.S.Kino 562
S.A.W. technology, high-speed analogue multiplexer using. T.M.Reeder, G.K.Montress and T.W.Grudkowski 756
Satellite microwave links, one-parameter adaptive cancellation for. N.J.McEwan and M.S.Mahmoud 624
Satellite paths, earth, annual and annual-worst-month statistics of fading on, at 11.5 GHz. G.Brussard and P.A.Watson 278
Satellite-to-ground link, relative phase measurements at 30 GHz between copolar and induced crosspolar signals produced by ice particles on a. P.F.Shutie, E.C.Mackenzie and J.E.Allnutt 105
Scaling of contour-coded binary images. P.Zamperoni 608
Scattering function, time-dlay/Doppler, for surburban mobile radio propagation at 436 MHz. A.S.Bajwa and J.D.Parsons 423
Scattering, investigation of, by corrugated structures using impedance boundary conditions. L.Shafai, K.Iskander and J.E.Hansen 144
Scattering, two-dimensional transient, a new space-time integral equation for. B.Jecko and A.Papiernik 512
Scattering widths, determination of, of a long thin wire using an open resonator. C.M.Tang and A.L.Cullen 245
Schottky-barrier diodes, ideal GaAs, low-frequency noise in. M.J.Sisson, A.M.Hansom, A.J.Grant, A.M.White and B.Day 662
Schottky barriers to n-InP, low leakage nearly ideal. O.Wada and A.Majerfeld 125
Schottky contacts, increasing the effective barrier height of, to n-$In_xGa_{1-x}As$. D.V.Morgan and J.Frey 737
Schottky diode parameters, a note on the evaluation of, in the presence of an interfacial layer. S.Ashok, J.M.Borrego and R.J.Gutmann 332
Schottky-diodes, characteristics of Cr-GaAs and Au-Cr-GaAs, influence of low-temperature thermotreatment on the. O.Yu Borkovskaya, N.L.Druitruk, R.V.Kovalova and Filativ. M.Yu. 700
Schottky diodes, ideal in n-InP, deep traps in. A.M.White, A.J.Grant and B.Day 409
Scratch filter using c.c.d.s.. A.H.James, G.A.C.Cutler, N.S.Shinn and D.V.McCaughan 691
Sea water, calculation of transmission coefficients for omega signals penetrating into. P.J.D.Gething and A.Mobbs 229
Selective filters using least-mean-square approximation technique. M.V.Popovich 596
Selectively ion implanted Gunn-f.e.t. integrated circuits for pulse regenerator. T.Mizutani, S.Ishida, K.Kurumada and M.Ohmori 294
Semiconductor devices, accuracy of numerical solution of temperature distribution in, under dynamic conditions. Z.Lisik 549
Semiconductor, generation of high-frequency electromagnetic and acoustic oscillations in a, in lowfrequency electric field. A.S.Bugaev, Y.V.Gulyaev and G.D.Mansfeld 403
Semiconductor junction transceiver for fibre optic communication. J.J.Geddes, P.E.Petersen, D.Chen and K.P.Koeneman Errata 530
Semiconductor-laser self-pulsing due to deep level traps. AJ.A.Copeland 809
Semiconductor lasers, analysis of the effect of spontaneous emission coupling on the number of excited longitudinal modes in. D.Renner and J.E.Carroll 779
Semiconductor lasers, multimode rate equation description of homogeneous spectral broadening in. M.Danielsen and F.Mengel 505
Semisymbolic analysis of network sensitivity. A.F.Schwarz 291
Sensing systems, e.h.v. electronic current-, transmission of microwave signals through an e.h.v. insulator for application to. D.V.Otto 692
Sensitivity analysis, on the, of linear active networks. E.A.Laksberg 221
Sensitivity method, eigen value, for optimal stabilisation of linear systems. V.Guruprasada Rau 59
Sensitivity, network, semisymbolic analysis of. A.F.Schwarz 291
Sensors, semipassive fibreoptic, fibredyne systems for passive or. S.A.Kingsley Errata 530
Sequences, long m, high-speed generation of. G.H.Tomlinson and P.Galvin 212
Sequences,-m, delayed versions of, shift-register connections. A.N.Van Luyn 713
Sequences, m-, generation, delayed, direct determination of feedback shift register connections for. D.G.Maritsas and A.Bounas 308
Sequential circuits, synchronous, an algorithm for the state assignment of. P.K.Lala 199
Sequential machines, fault detection in, with increased fault coverage. S.R.Das and A.Bhattacharyya 28
Shift-register connections, feedback, direct determination of, for delayed m-sequences generation. D.G.Maritsas and A.Bounas 308
Shift register connections for delayed versions of m-sequences. A.N.Van Luyn 713
Short-duration pulses for time-domain spectrometry using directional couplers. R.J.Hawkins 201
Short thin-wire antenna to measure the horizontal electric-field component at v.l.f. on the earth's surface. D.V.Thiel 804
Signal/noise improvement, some conditions of, using recursive and nonrecursive integrators. J.D.E.Beynon and C.P.Traynar 554
Signal processing in the reflective acoustic microscope. J.Attal and G.Cambon 472
Signals, (1,0,-1) multiple-response, a new method of timing signal recovery for. P.N.Ridout 354
Signals, experiments with unmodulated, adaptive cancellation of crosspolarisation. P.Delogne and P.Sobieski 770
Signals, multilevel, in digital optical-fibre communications. R.Petrovic 806
Silicon, ion implantation of neon in, for planar amorphous isolation. J.A.Yasaitis 460
Silicone- and ethylene-vinyl-acetate-coated laser-drawn silica fibres with tensile strengths >3.5 GN/m^2 (500 kp.s.i.) in >3km. lengths. T.J.Miller, A.C.Jun.Hart, W.I.Jun.Vroom and M.J.Bowden 603
Simple iterative method for overcoming errors due to heating of current-measueing shunts. C.R.Melbourne and M.R.Barrault 800
Simple method for computing elements of order 2^nn, where $nB2^{p-1}$-1 and $2 \leqslant k \leqslant p+1$, in GF $[(2^p-1)^2]$. I.S.Reed, T.K.Truong and R.L.Miller 697
Simple method for measuring material dispersion in optical fibres. T.Tanifiju and M.Ikeda 367
Simple method of designing suboptimal dynamic controllers for discrete linear systems. C.S.Berger 4
Simple relation between differential mode delay in optical fibres and the deviation from optimum profile. K.Petermann 793
Simplified method for generating precise triangular waves. R.Genin, C.Jezequel and J.Genin 162
Simulation of inductors and capacitors using operational-amplifier compensation pole: a caution. B.Gilbert 832
Single Josephson junction superconducting memory cell. J.A.Blackburn and H.J.T.Smith 597
Single-mode fibre connectors. N.Shimuzu and H.Tsuchiya Errata 682
Sinusoidal microbending loss of HE_{11}-mode in step-index fibres. J.-T.Horng 528
Skeletonisation of binary patterns: a heuristic approach. R.N.Jones and M.C.Fairhurst 265
Sliding mean edge estimation. G.E.Ford 610
Slotted waveguide linear array with polarisation control. A.J.Sangster 616
Small toroidal antennas. T.S.M.Maclean and F.Rahman 339
Snow at 11.6 GHz, depolarisation due to. I.J.Dilworth and B.G.Evans 315
Soft decision decoding of transmission codes. M.R.L.Hodges and E.V.Jones 582
Solar cells, polycrystalline, examination of grain boundaries in, using a scanning optical microscope. J.N.Gannaway and T.Wilson 507
Solar cells, polysilicon, deep traps in. A.Criado, B.Alonso and J.Piqueras 622
Solitons, application of, to communication system. P.L.Chu and T.Whitbread 531
Solution of the discrete regulator problem using the sign matrix function. A.Halbersberg and Y.Bar-Ness 286
Some considerations of signal/noise improvement using recursive and nonrecursive integrators. J.D.E.Beynon and C.P.Traynar 554
Some effects of wave propagation in the gate of a microwave m.e.s.f.e.t.. P.H.Ladbrooke 21
Some properties of no-power electronic circuits. G.M.Ettinger and L.T.Shooter 791
Some proposals for improved forms of precision fast digital-analogue and analogue-digital converters. J.R.Stockton and R.B.D.Knight 790
Spatial distribution of defects in SiO_2. H.A.Mughal, W.Eccleston and R.A.Stuart 761
Spectral and transient response of low-threshold proton-isolated (GaAl)As lasers. M.R.Matthews and A.G.Steventon 649
Speech, time-encoded. R.A.King and W.Gosling 456
Stability, note on the, of first-order p.w.m. systems. R.Unnikrishnan 774
Star couplers using fused biconically tapered multimode fibres. E.G.Rawson and A.B.Nafarrate 274
State asignment and entropy. C.R.Edwards and E.Eirs 390
State assignment, an algorithm for the, of synchronous sequential circuits. P.K.Lala 199
State assignment, physical interpretation of. C.R.Edwards 428
State equations, transformation of, to the controllable canonical form. J.Hickin and N.K.Sinha 546
Statistical design-centring for electrical circuits. R.S.Soin and R.Spence 772
Stochastic approximates, error bounds on, in discrete nonlinear dynamical systems.. O.Ibidapo-Obe 230
Stochastic approximation, on the use of, in the state-parameter identification problem. D.Sprevak and M.M.Newmann 351
Stochastic approximation, the use of, for state estimation in discrete nonlinear dynamical systems, comment on. D.Sprevak and M.M.Newmann 730
Stochastic data analysis:, new approach to, the Nile river at Aswan. O.Obidapo-Obe 765
Stochastic learning automata, design of, using adaptive digital logic elements. R.G.Neville, C.R.Nicol and P.Mars 324
Stochastic learning automata, nonlinear, design of. R.G.Neville, C.R.Nicol and P.Mars 396

Stochastic learning automata, synthesis of. R.G.Neville, C.R.Nicol and P.Mars 206
Store enhancement, computer, by interchange. D.J.Wheeler 498
Strain gauge, fibre-optical. M.Johnson and R.Ulrich 432
Stripline coupler, aperture coupled. M.Kumar and B.N.Das 216
Striplines, modified suspended, for microwave integrated circuits. J.P.Villotte, M.Aubourg and Y.Garault 602
Study of a modified-estimating automaton in stationary environments. M.J.Coutts and P.Mars 404
Submicrosecond X-ray lithography. D.J.Nagel, M.C.Peckerar, R.R.Whitlock, J.R.Greig and R.E.Pechacek 781
Suboptimal dynamic controllers, designing, simple method of, for discrete linear systems. C.S.Berger 4
Substrate dependence on InP m.e. s.f.e.t. performance. H.Morkoc, J.T.Andrews and S.B.Mhyder 715
Subthreshold behaviour of e.s.f.i.-s.o.s. transistors. D.Kranzer and W.Fichtner 161
Superconducting memory cell, single Josephson junction. J.A.Blackburn and H.J.T.Smith 597
Supply-current analysis (Scan) as a screen for bipolar integrated circuits. A.J.Melia 434
Surface acoustic wave device, temperature stable design of a, on silicon. G.Cambon and J.Attal 536
Switched-capacitor filters, the derivation of, from active-RC prototypes. G.C.Temes 361
Switched-capacitor integrator, an improved. G.C.Temes and I.A.Young 287
Switched-capacitor simulation of grounded inductors and gyrators. B.J.Hosticka and G.S.Moschytz 788
Switching conduction in ion-irradiated layers in GaAs. A.J.N.Houghton 102
Switching, millimetre-wave, by optically generated plasma in silicon. C.H.Lee, S.Mak and A.P.DeFonzo 733
Switching, *p-i-n* diode reverse-bias, via inductive discharging. C.J.Georgopoulos and V.Makios 723
Synchronisation, p.c.m. frame, effect of nonrandom digital signals on. R.J.S.Bates 296
Synthesis of stochastic learning automata. R.G.Neville, C.R.Nicol and P.Mars 206
System reduction using Cauer continued fraction expansion about s = 0 and s = oo alternately. R.Parthasarathy and Sarasu John (Mrs) 261
Systematic synthesis of combinational circuits using multiplexers. B.Dormido and D.Canto 588

T

Telemetry, drill-rod, electromagnetic basis of. D.A.Hill and J.R.Wait 532
Teletraffic, increasing the efficiency of roulette simulation of. M.H.Ackroyd 270
Temperature dependence of multiplication noise in silicon avalanche photodiodes. H.Kanbe 539
Temperature distribution, accuracy of numerical solution of, in semiconductor devices under dynamic conditions. Z.Lisik 549
tensile strengths > 3.5 GN/m² (500 kp.s.i.) in > 3km. silicone-and ethylene-vinyl-acetate-coated laser-drawn silica. T.J.Miller, A.C.Jun.Hart, W.I.Jun.Vroom and M.J.Bowden 603
Tensile strengths > 3.5 GN/m² (500 kp.s.i.) in lkm lengths silica fibres with. F.V.DiMarcello and A.C.Hart.Jr. 578
TEO1 attenuation of 90D sharp bend in reduced diameter circular waveguide. C.R.South 66
Ternary identity cells, implementation of, using c.m.o.s. integrated circuits. H.T.Koanantakool 462
Ternary system, a functionally-complete. V.H.Tokmen 69
The derivation of switched-capacitor filters from active-RC prototypes. G.C.Temes 361
The effect of surface preparation on voltage threshold in liquid crystal phase-change cells. J.C.Varney and L.E.Davis 25
The influence of a fibre structure on optical loss in a graded-index fibre. N.Kashima, N.Uchida, N.Susa and S.Seikai 78
The 'mirrored meander' -— a directional coupler in microstrip. R.Horton 402
The Yagi array of concentric loops. G.W.Raffoul and L.C.Shen 168
Theories, a comparison of, discrete radiation from curved single-mode fibres:. R.A.Sammut 103
Thermal gradient enhanced current spreading in d.h. lasers. R.T.Jr.Lynch, L.Yang and R.Y.Hung 769
Thermal strain effects of acoustic surface waves in layered media. K.Yamanouchi, M.Ishii and K.Shibayama 784
Thickness-shear stress distributions of the oscillating planaconvex AT-cut quartz-crystal resonator. S.Yamagata, K.Yamamoto, I.Fukai and I.Yasuda 450
Third-order intermodulation distortion in microwave amplifier. K.K.Agarwal and Y.L.Kuo 282
Three-dimensional finite-element method for solving electromagnetic problems. R.L.Ferrari and G.L.Maile 467
Three-valued c.m.o.s. cycling gates. H.T.Mouftah and K.C.Smith 36
Threshold dependence on active-layer thickness in InGaAsP/InP d.h. lasers. R.E.Nahory and M.A.Pollock 727
Time-delay/Doppler scattering function for surburban mobile radio propagation at 436 MHz. A.S.Bajwa and J.D.Parsons 423
Time-dispersion measurement in optical fibre by near- and far-field scanning technique. G.Cancellieri 465
Time-domain deconvolution, envelope-constrained, for transversal-filter equalisers. D.Preis 37
Time domain reflectometry systems, application of super-resolution techniques to. B.Chambers 97
Time-domain spectrometry, short-duration pulses for, using directional couplers. R.J.Hawkins 201
Time-domain synthesis of RC bidimensional networks via the approximate solution of Volterra's equations. R.Lojacono 182
Time-encoded speech. R.A.King and W.Gosling 456
Transceiver, semiconductor junction, for fibre optic communication. J.J.Geddes, P.E.Petersen, D.Chen and K.P.Koeneman Errata 530
Transfer function, realisation of nth-order lowpass voltage, by active *R* circuit: signal-flow-graph approach. C.Acar 729
Transfer functions, partial fraction expansion of, with multiple quadratic poles. P.R.Adby 290
Transformation of state equations to the controllable canonical form. J.Hickin and N.K.Sinha 546
Transforms, complex theoretic, fast algorithm for computing. I.S.Reed, K.Y.Liu and T.K.Truong Errata 411
Transforms, computing complex number-theoretic, fast algorithm for. I.S.Reed and T.K.Truong 231
Transforms, rectangular, complex convolutions using. N.S.Reddy and V.U.Reddy 458
Transient and frequency responses of systems with time delays. M.J.Underhill 284
Transient response of nre type of varactor diode having multilayer structure. S.Shirota and S.Kaneda 56
Transistor, GaAs m.a.o.s.f.e.t. memory. B.Bayraktaroglu, A.Colquhoun and H.L.Hartnagel 19
Transistor threshold voltages, buried-channel m.o.s., high-accuracy extraction of. L.Gabler, B.Hoefflinger, J.Schneider and G.Zimmer 23
Transistors, e.s.f.i.-s.o.s., subthreshold behaviour of. D.Kranzer and W.Fichtner 161
Transitional Butterworth-Chebyshev filters. S.C.Dutta Roy and P.Varanasi 179
Transitional Butterworth-Chebyshev filters. P.Thajchayapong, F.Cheevasuvit and S.Manapee 680
Transmission of microwave signals through an e.h.v. insulator for application to e.h.v. electronic current-sensing systems. D.V.Otto 692
Traps, deep, in ideal n-InP Schottky diodes. A.M.White, A.J.Grant and B.Day 409
Traps, deep, in polysilicon solar cells. A.Criado, B.Alonso and J.Piqueras 622
Traps, deep level, semiconductor-laser self-pulsing due to. AJ.A.Copeland 809
Tropospheric, relative importance of, and precipitation scatter in interference and co-ordination. J.A.Lane 425
True quadrature taps for s.a.w. delay lines. R.J.Murray, R.C.Peach and S.Neylon 631
Tuners, u.h.f. tv, fabricated by ion implantation, GaAs Varactor diodes for. I.Niikura, N.Toyoda, Y.Shimura, S.Yokoyama, M.Mihara, T.Hayashi and T.Hara 9
Tungsten/gold gate GaAs microwave f.e.t.. H.Morkoc, J.Andrews, R.Sankaran and J.H.Dully 514
Two-way transmission experiemtns over a single optical fibre at the same wavelength using micro-optic 3 dB couplers. K.Minemura, K.Kobayashi, T.Yanase, R.Ishikawa, M.Shikada, A.Ueki and S.Sugimoto 340

U

U.H.F. low-noise GaAs m.e.s.f.e.t. amplifier for colour t.v. broadcasting translator. M.Mitama and H.Katoh 319
Ultrasonic transducers, low-loss wideband, results on, for non-invasive medical application. J.Souquet and Ph.Defranould 235
Use of current controlled GaAs L.P.E. for optimum doping profiles in L.S.A. diodes. D.J.Lawrence and L.F.Eastman 77
Use of principal mode numbers in the theory of microbending. J.Arnaud 663
Use of silicon self-scanned linear photodiode arrays for the direct display of transmission electron microscope energy loss spectra. D.G.Jenkins, C.J.Rossouw, B.L.Jones, G.R.Booker and P.W.Fry 174

V

V-groove substrate fed logic. Y.-L.Ho, F.E.Holmes and C.A.T.Salama 240
Vapour-phase axial-deposition method, low-OH-content optical fibre fabricated by. S.Sudo, M.Kawachi, T.Edahiro, T.Izawa, T.Shioda and H.Gotoh 534
Varactor diode, transient response of new type of, having multilayer structure. S.Shirota and S.Kaneda 56
Varactor diodes, GaAs, for u.h.f. tv tuners fabricated by ion implantation. I.Niikura, N.Toyoda, Y.Shimura, S.Yokoyama, M.Mihara, T.Hayashi and T.Hara 9
Varactor diodes, ion implanted GaAs: capacitance uniformity. N.Toyoda, I.Niikura, Y.Shimura, T.Hozuki, H.Sugibuchi, M.Mihara and T.Hara 152
Varactor diodes, low-distortion downconvertor using. G.Ohm 303
Varactors, p⁺-n hyperabrupt GaAs, grown by molecular-beam epitaxy. D.W.Covington and W.H.Hicklin 752
Variation with height of the statistics of radar reflectivity due to hydrometers. M.P.M.Hall and J.W.F.Goddard 224
Variational expression of the propagation constant for leaky modes. S.Kawakami and K.Ogusu 73
Very low noise silicon planar avalanche photodiodes. J.J.Goedbloed and E.T.J.M.Smeets 67
Voice-grade circuits, 3-level partial-response signalling for. J.Das and S.Rakshit 579

W

Walsh spectrum domain, a minterm interchange operation in the. E.Eris 92
Walsh transform image, partial correction of transmission errors in, without resource to error correction coding. W.C.Wong and R.Steele 298
Waveguide electro-optic modulators, zinc sulphide leaky, limitations of. P.L.Jones and D.R.Cotton 10
Waveguide feed antenna, choked, beamwidth variation with aperture diameter of the. K.M.Keen 406
Waveguide linear array, alotted, with polariation control. A.J.Sangster 616
Waveguide optimisation, 50mm diameter TE_{01} model helical. G.H.Childs 140
Waveguide, radial, radiation from a, in a magnetoplasma. L.Kumar and J.S.Verma 57
Waveguides - — a comparison, multimode step-index, leaky modes and rays on. J.D.Love, C.Winkler, R.Sammut and K.Barrell 489
Waveguides, fibre, power attenuation in bent multimode step-index slab and. J.D.Love and C.Winkler 32
Waveguides, fibre, power attenuation in bent parabolic-index slab and. C.Winkler, J.D.Love and A.K.Ghatak 570
Waveguides, geometry of, in a dichroic secondary mirror. R.J.Langley and E.A.Parker 443
Waveguides, step-index, Goos-Hanchen shift for leaky rays on. J.D.Love and C.Winkler 379
Wavelength dependence of modal dispersion in graded index optical fibres. L.Jeunhomme, J.P.Pocholle and J.Raffy 364
Wavelength-dispersive properties of glasses for optical-fibres: the germania enigma. M.J.Adams, D.N.Payne, F.M.E.Sladen and A.H.Hartog 703
Wavelength division two-way fibre-optic transmission experiments using micro-optic duplexers. S.Sugimoto, K.Minemura, K.Kobayashi, M.Shikada, H.Nomura, K.Kaede, A.Ueki and S.Matsushita 15
Waves, ground, electric/magnetic field ratios of, in a realistic terrain. J.H.Causebrook 614
Waves, membrane, convolution by. P.Merilainen and M.Luukala 745
White-light emission from GaAs m.o.s. structures. B.Bayraktaroglu and H.L.Hartnagel 470
Wide-range monolithic bipolar-j.f.e.t. c.c.o.. F.V.J.Sleeckx and W.M.C.Sansen 259
Wideband near-i.r. continuum (0.7-2.1 *um*) generated in low-loss optical fibres. Chinlon.Lin, V.T.Nguyen and W.G.French 822

X

X-band balanced mixer using evanescent-mode circuitry. G.Begemann and C.Peters 748
X-ray lithography, submicrosecond. D.J.Nagel, M.C.Peckerar, R.R.Whitlock, J.R.Greig and R.E.Pechacek 781

Z

Zero-mode dispersion in single-mode fibres. W.A.Gambling, H.Matsumura and C.M.Ragdale 618

Zero, optimum single-, lead compensation of systems having two dominant poles. G.J.Sloggett 111

Zeros, imaginary-axis, general analysis of nonmonotonic lowpass filters having multiple pairs of, with weighted least-mean-square error characteristic. D.T.Phuc and J.Attikiouzel 600

Zeros, imaginary-axis, least-mean-square (minimum integrated power loss ratio) low-pass filters with a pair of. P.Thajchayapong 268

Zeros, invariant, computing the, of multivariable systems. Y.Shamash 208

Zeros, multiple pairs of imaginary-axis, on lowpass filters having, at two distinct points in the stopband with l.m.s. error characteristic. D.T.Phuc and J.Attikiouzel 706

Zinc contamination and misplaced p-n junctions in InP-GaInPAs d.h. lasers. J.J.Coleman and F.R.Nash 558

Zinc ions into GaAs, comparison of electrical profiles from hot and cold implantations of. S.S.Kular, B.J.Sealy and K.G.Stephens 22
